ATTN: Mill Creek, Corning Levee District, and Big Tarkio Drainage District

RE: 2021 NBR: 210458200 (RMA); (AIP) For Mill Creek, Corning Levee District, and Big Tarkio Drainage District

Request Type (s):
BL Breached Levee

Due to the 2019 flood event, levees along the Missouri and Mississippi Rivers and tributaries in Missouri were breached. The 2021 Special Provisions allow the Risk Management Agency to adjust the rate for levees temporarily or permanently repaired to prior design specifications.

RMA received the certification that the Mill Creek Dyke and Drainage District, Corning Levee District, and Big Tarkio Drainage District have been repaired to prior specifications and the repairs were completed by the Earliest Plant Date for Grain Sorghum and Soybeans, but after the Earliest Plant Date of Corn and Popcorn. This written agreement allows acreage protected by the Mill Creek Dyke and Drainage District, Corning Levee District, and Big Tarkio Drainage District to return to the Sub County Area classifications prior to the levee breach for Grain Sorghum and Soybeans. For Corn and Popcorn, this BL Offer is only applicable to acreage planted on or after April 14, 2021 or was prevented from planting.

If these offered changes are not acceptable, the insured may submit a request for Actuarial Change. Any request for Actuarial Change must meet all minimum supporting documentation requirements and deadlines found in the 2021 Written Agreement Handbook. A request for actuarial change must also contain supporting documentation as to why the policyholder believes this insurance offer is not acceptable. Failure to provide acceptable supporting documentation may result in non-acceptance of the request.

If you have any questions, please contact this office at 785-228-5512.
