

Rainfall_Index_HistoricData2010CY.txt is a file containing the historical index values utilized by the Rainfall Index insurance plan (13) for the 2010 crop year. The historical index values displayed for a given grid, index interval, and sample year is stated as the percent of normal expressed in decimal format (i.e. 80% is expressed as 0.80). The historical index values provided here do not indicate an **actual** insurance payment was or is due to any insured for a given sample year selected. As additional years of data are added, the final index values may change due to the re-calibration of the index. As such, the data contained in this file is only pertinent to the 2010 crop year and is not valid for use in relation to any other crop year. Official insurance payment information for a given crop year is released by RMA according to the insurance policy provisions and procedures.
