**CONTINUOUS RATE CALCULATION**

Note: The following capping procedure is intended to keep a producer's base premium rate including the residual factor from exceeding 20% more than what this year's insurance choices would have been last year given this year's rate yield and coverage level selection. Report this value in the Preliminary Base Rate (field 43) if it was used to determine the Base Premium Rate that was reported.
Capped Prior Year's Adjusted Continuous Rating Base Premium Rate	Internal	V9(08)	Round to 8 decimal places, including each interim step.	The result of prior year's adjusted continuous rating base rate * prior year's coverage level rate differential * 1.20.
Base Premium Rate	42	V9(08)	Round to 8 decimal places, including each interim step.	The lower of current year's continuous rating base premium rate, capped adjusted yield span base premium rate, capped prior year's adjusted continuous rating base premium rate, or .999.
Standard Deviation	Internal	V9(08)	Round to 8 decimal places	According to CRC Continuous Rating instructions.
Probability Variable T	Internal	V9(08)	Round to 8 decimal places	Standard Deviation/ (Standard Deviation + 0.33267 * (1-Coverage Level Percent))
T Factor	Internal	V9(08)	Round to 8 decimal places	$0.4361836 * \text{Probability Variable T} - 0.1201676 * \text{Probability Variable T}^{** 2} + 0.937298 * \text{Probability Variable T}^{** 3}$

## Type 11 – Crop Revenue Coverage/Liability/Producer Premium Calculation

Edit Description

Field Name	Field Number	Picture	Rounding	Description
CRC High Price Factor	Internal	9(04)V9(04)	None	CRC High Price Factor on ADM-C.
Price Risk	Internal	9(04)V9(04)	Nearest Dollar & Cents	Calculated Price Risk.
Unit Factor(s)	Internal	9(01)V9(03)	None	The option factor from ADM K for OU and BU, ADM WC for EU. For enterprise the basic unit (BU) factor and enterprise unit (EU) factor (Unit Premium Adjustment Factors) will apply.
Optional Coverage Factor(s)	Internal	9(01)V9(03)	None	If Common Option Codes (Field 46) do not equal spaces, the Option Factor from ADM K. If Common Option Codes are spaces, the Option Coverage Factor(s) = 1.000. Round to 3 decimal places when multiple factors are used to determine this value.
Residual Factor	Internal	9(01)V9(03)	None	The residual factor from ADM2 by coverage level if applicable. If residual factor does NOT apply default to 1.000. For basic (BU) and optional (OU) units the factor will be used as is from the ADM2. For enterprise (EU) unit the factor will be one-half of the ADM2 factor rounded to the third decimal. If the ADM 2 does not have a residual factor to adjust for the enterprise coverage level selected then the adjusted residual factors by coverage level are: 65%=1.000, 70%=1.028, 75%=1.055, 80%=1.083, 85%=1.110.
Premium Rate Surcharge %	Internal	9(01)V9(02)	None	If the Premium Rate Surcharge Flag (Field 49) is Y, the Premium Rate Surcharge % = 0.05. If the Premium Rate Surcharge Flag equals spaces, the Premium Rate Surcharge % = 0.00.
