PHT is designed to be an informational reporting tool for either a 1 year or 5 year inquiry request for an active processing year. When a 1 Year inquiry request is submitted, the requestor will receive **only** the previous year's data information. When a 5 Year request is submitted, the requestor will receive the previous 5 years, providing data is available. The layout of Record 81 with it's respective record types will not always be in the same order/sequence as the records submitted for editing. The procedure is NOT designed to provide a specific year upon request.

Information retrieved from a PHT request – submitted with the type 10/14 record – is based ONLY on the primary insurer's SSN taken from the type 10 record. Limited information is provided on SBI's, affiliated with the primary insurer, not to include crop or cross-reference data.

PHT has been revised to provide a consolidated record layout descriptor for a single or five(5) year report. Under the 'Field Edit' column will indicate which year that field was active. A duplicate field number with an asterisk(*) beside it will indicate that 'field position' would have had a different field name for the year indicated with the exception of the Type 15 record which reference the 'field number'.
