YE	Applicable for all crops eligible for APH exclusion designated in the actuarial.	Actual yields in an APH database identified with the following yield descriptors are eligible for exclusion in an eligible crop year identified in the actuarial documents - A, AY, BF, DA, DG, DV, G, NA, NR, NW, PA, PR, PW, R, RY, and WY.		Yield Limitation Code must equal "09" if YE and YA are elected together or YE, YA, and TA are elected. Yield Limitation Code must equal "15" if YE is elected alone or YE and TA are elected together.	If the exclusion of actual yields for eligible crop year(s) results in less than four years of yields in the APH database, the applicable T-Yield is used to maintain a minimum base period of four yields. If the variable T-Yield applies to an APH database, the T-Yield used to complete the four-year minimum base period uses the variable percentage based on the number of actual/assigned yield for the crop in the county. Excluded yield years still count as a year of producing the crop for variable T-Yield purposes.
