P91 Duplicate Policy			
P94 Producer History			

P95 BFR History
P98Z Unknown Malformed Batch
P99Z Exception

Notes:

For livestock premium records, the downhill delete process works like non-livestock policies during any given sales window. Specifically, if an AIP submits an endorsement (P16/P17/P18) and gets it accepted and then submits the P10 or P14 without that endorsement during the sales window (before the noon cutoff), PASS will downhill delete that endorsement.
