| Varietal Group B (Fresh) 115 *5 | | Organic(Transitional) Irr. 712 *6 | | |

Statement

General

SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1; for acreage planted after June 30, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred (i.e., planted September 2003 enter 2004).

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year; e.g., if 2004 is the year insurance is in effect and the tress/vines were set out in April of 1997, then the leaf year is derived as follows: 2004 minus 1997 plus 1 equals 8.

Grafted acreage will have the following percentages of the applicable T-Yield corresponding to the LEAF YEAR and SET OUT YEAR of initial planting:

| Density (trees/aces) | 1st year after grafting | 2nd year after grafting | 3rd year after grafting | 4th year after grafting | 5th year after grafting |
|----------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|-------------------------------|
| 0-299 | 0% | 30% | 60% | 90% | 100% |
| 300 & greater | 10% | 50% | 70% | 100% | 100% |

The production reporting date will be the acreage reporting date.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Special Provisions of Insurance

2011 and Succeeding Crop Years

Year: 2011 Commodity: Apples (0054)
Date: 8/20/2010 Plan: APH (90)

State: Washington (53)
County: Franklin (021)

Type

- *4 Varietal Group A insurable varieties: Fuji, Braeburn, Gala, Jonagold, Crispin, Cripps Pink (Pink Lady), Cameo, Honeycrisp, Sommerfeld, Royal Gala and Macoun.
- *5 Varietal Group B insurable varieties: All other Apple varieties not specified in Group A.

Practice

- *6 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

Date

In accordance with section 9(a)(3), the calendar date for the end of insurance period for each crop year is November 10 for the Fuji variety.

Quality

In accordance with the definition of Grade Standards contained in section 1 of the Apple Crop Provisions, a Washington Fancy Grade or better in accordance with the Washington State Standards for apples shall be used in lieu of US Fancy Grade or better when the optional coverage for quality adjustment is selected.
