- *3 Varietal Group B insurable varieties: All other Apple varieties not specified in Group A.

Special Provisions of Insurance

2011 and Succeeding Crop Years

Year: 2011 Commodity: Apples (0054)
Date: 8/20/2010 Plan: APH (90)

State: Wisconsin (55)
County: Sauk (111)

Practice

- *4 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.
