Statement

General

The insured must provide the Insurance Provider a copy of their tomato processor contract(s) the earlier of August 20 or the date of damage to the insured crop.

Optional units on separate acreage planted to tomatoes must consist of a minimum of forty (40) acres. Acreage that is less than forty (40) acres will attach to the closest unit within the section, section equivalent or FSA Farm Serial Number.

In accordance with section 12 (b)(1) of Processing Tomato Crop Provisions, the maximum amount of the replanting payment per acre will be the lesser of 25 percent of the production guarantee or six tons, multiplied by your third stage (final) price election, multiplied by your share.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Practice

- *5 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

Date

In lieu of the cancellation and termination dates in the processing tomato crop provisions, the cancellation and termination dates are January 31.
