Statement

General

In lieu of the definition of "Wet in-shell" in section 1 of the Macadamia Nut Crop Provisions, wet in-shell excludes immature and unsound nuts (floaters and peewees).

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Practice

- *3 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.
