Fresh 101		No Practice Specified (OT) 724 *4		
Fresh 101		No Practice Specified 997		
Processing 102		No Practice Specified (OC) 723 *4		
Processing 102		No Practice Specified (OT) 724 *4		
Processing 102		No Practice Specified 997		

### Statement

#### General

##### SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

The production reporting date will be the acreage reporting date.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

#### Practice

\*4 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

#### Price

FOB shipping point price information for Maryland and Pennsylvania reported in Peach Market News Service published by the Pennsylvania Department of Agriculture will be used to determine the applicable average FOB shipping point price according to the provisions of the policy.

Allowable cost for fresh peaches for determining actual price per bushel will be \$5.00 per bushel. Allowable cost for processing peaches for determining actual price per bushel will be \$1.75 per bushel.

#### Insurance Availability

Nectarines are insurable as a varietal class of peaches.
