Statement

General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Type

- *2 Recommended and adapted blue or purple skinned cultivars will be considered insurable as the red type and will be designated as the red type for the purposes of this policy.
- *3 Recommended and adapted yellow skinned varieties such as Yukon Gold, will be considered insurable as the white type and will be designated as the white type for the purposes of this policy.

Practice

- *4 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

Insurance Availability

In accordance with section 8 of the Basic Provisions, insurance shall not attach to varieties of the fingerling type, unless provided by written agreement.

Quality

With regard to Grade Inspections and the respective U.S. Grade Standard (i.e. Processing, Chipping, Seed and all other Potatoes), the only size modifications recognized are those instituted by State or Federal Marketing Orders.
