### Statement

#### General

Raw sugar content percentage for use in adjusting harvested production or unharvested production that is appraised after the earliest delivery date that the processor accepts harvested production as provided in the Sugar Beet Crop Provisions: 13.0 percent.

In accordance with the Common Crop Insurance Policy Basic Provisions (11-BR), section 13(c), the replanting payment per acre for sugar beets is one and a half tons, multiplied by your price election, multiplied by your insured share.

In lieu of Section 24(a) of the Basic Provisions, interest will begin to attach on unpaid premium on the first of the month following the first billing date provided that a minimum of 30 days have passed from the first billing date.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

#### Practice

\*5 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

#### Date

The production reporting date will be the acreage reporting date.

**Special Provisions of Insurance**  
**2012 and Succeeding Crop Years**

Year: 2012

Commodity: Sugar Beets (0039)

State: California (06)

Date: 4/15/2011

Plan: APH (90)

County: Tulare (107)
