Statement

General

SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

Special Provisions of Insurance

2013 and Succeeding Crop Years

Year: 2013	Commodity: Apples (0054)	State: Georgia (13)
Date: 8/14/2012	Plan: APH (90)	County: Hall (139)

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

For planting densities not shown on the transitional yield table, contact the Regional Office for the applicable t-yield.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Type

- *5 Varietal Group B insurable varieties: All other Apple varieties not specified in Group A.
- *6 Varietal Group A insurable varieties: Ambrosia, Braeburn, Cameo, Cripps Pink, Crispin, Fuji, Gala, Honeycrisp, Jonagold, Macoun, and Sommerfeld. Each specified variety within Varietal Group A will include all commercially recognized selections and brand names, mutations, or sports; but, does not include hybrids created by crosses between the stated variety and any other varieties.

Practice

- *7 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

Date

The production reporting date will be the acreage reporting date.

Insurance Availability

The optional coverage for quality adjustment of the Apple Crop Insurance Provisions is not applicable for any apple acreage in this county.
