Statement

General

SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Practice

- *4 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

Date

The production reporting date will be the acreage reporting date.

Price

The harvest cost amount is \$35 per ton for Concord and Niagara varieties and \$90 per ton for all other varieties.

Special Provisions of Insurance

2013 and Succeeding Crop Years

Year: 2013	Commodity: Grapes (0053)	State: Washington (53)
Date: 8/14/2012	Plan: APH (90)	County: Skamania (059)

In accordance with Section 15(d) of the Basic Provisions, the price used to compute your indemnity on unharvested acreage will be the price election minus the harvest costs amount as provided in these Actuarial Documents.

In accordance with section 3(d) of the Grape Crop Provisions, the price contained in your grape contract may be used for your price election. The contract price used will be the amount per ton specified in the contract without regard to incentives or discounts. If more than one contract price exists, the established price election will be the weighted average for all adjusted contract prices. In no case will the price be greater than the Maximum Contract Price provided in the Actuarial Documents for the applicable grape type/variety. Grapes may be insured using the contract price only if: 1) a written contract is in effect between the producer and a winery or a processor for the current crop year; 2) the contract states amount that will be paid per ton and number of tons or acres contracted; 3) a copy of the contract(s) is provided to us no later than the acreage reporting date; 4) all production from insurable acreage of the variety must be grown under a grape contract; and 5) acreage is insured at a buy-up level of coverage.

Insurance Availability

Insurable age of vines: Fourth growing season after being set out.

- *10 In addition to the Grape Crop Provisions requirements of insurability, Pinot grapes shall be insurable as Pinot Noir only if:
- 1) the grapes are properly and timely pruned for the purposes of producing a Pinot varietal wine; and
 - 2) the majority of Pinot tonnage was utilized for the production of a varietal Pinot wine in at least two of the previous three crop years.

Failure to comply with either of these conditions will result in the Pinot grapes being insurable as Pinot Noir for Sparkling.
