### Statement

#### General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

#### SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

#### Practice

- \*4 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

## Special Provisions of Insurance

### 2014 and Succeeding Crop Years

Year: 2014

Commodity: Plums (0092)

State: Washington (53)

Date: 7/25/2013

Plan: APH (90)

County: Walla Walla (071)

#### Date

The production reporting date will be the acreage reporting date.

#### Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

#### Insurance Availability

The interspecific plum hybrid types of Aprium and Plumcot are not insured under the Stonefruit Crop Provisions.

#### Quality

- \*8 Marketable production and grade standards for the crop: U. S. No. 1, unless further modified by State or Federal Marketing Order, when applicable. For Pluots, marketable production shall also include fruit with defect & damage scores equivalent to or less than those for U.S. No. 1.

In addition to section 11(c)(4) of the Stonefruit Crop Provisions, for harvested production subtract the Harvest Cost dollar amount shown on the Prices Tab of the Actuarial Information Browser from the price received by the insured to adjust for costs incurred for harvest and delivery; ensure all values are expressed in the commodity's unit of measure. The cost adjustment for harvest and delivery shall not be deducted from the fruit's value when the insured does not incur such expense or if such costs are not customary for the insured stonefruit crop.
