Statement

General

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

The Catastrophic Risk Protection endorsement (CAT coverage) is not available.

For the year of set out or grafting to be counted as a completed growing season, setting out or grafting must occur prior to July 1 for crop insurance program purposes.

Unit Division: Optional Units are not allowed by section, section equivalent, FSA farm serial number or for irrigated and non-irrigated practices.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In accordance with Section 8(b) of the ARH Tart Cherry for Processing Pilot Crop Provisions, the insured crop will be tart cherries for processing grown on acreage that has produced an average of 3,900 pounds per acre (3,900 pounds prorated if less than one acre) in one of the five previous crop years.

Special Provisions of Insurance

2014 and Succeeding Crop Years

Year: 2014

Commodity: Cherries (0057)

State: Michigan (26)

Date: 8/21/2013

Plan: Actual Revenue History (47)

County: Van Buren (159)

Grading standards for tart cherries: The marketable production of tart cherries includes the production that meets or exceeds U.S. No. 1 as stated in the United States Standards for Grades of Red Sour Cherries for Manufacture, or would be accepted by a packer, processor, or other handler even if failing to meet the aforementioned grading standard.

Type

Tart Cherries (Processing) include tart cherry varieties and production practices which produce fruit that is intended for processing.

Practice

- *9 In addition to any requirements for separate ARH yields and revenues (databases) contained in the policy and in FCIC approved procedures, separate databases for certified and transitional acreage are required for any insured crop grown using an organic farming practice. Only acreage, production, and revenue history from each acreage type of the organic farming practice will be contained in the applicable database. Each database will include production, acreage, and revenue from any applicable buffer zone. Acreage, production, and revenue records of the insured crop from transitional acreage will be used to establish the certified organic approved ARH Revenue when such acreage initially qualifies as certified organic acreage. A variable T-Revenue will be used to complete the database, if required. Amounts shown on the Transitional Revenue Substitution Table and the Transitional Yield Substitution Table apply to the organic farming practice.

Date

The revenue reporting date will be the acreage reporting date.
