Statement

General

For the purpose of section 12(d)(1)(iii) of the Southern & Central Potato Crop Provisions, the date potatoes would have reached full maturity will be 100 days after the date of planting or replanting.

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In lieu of Section 17(f)(5)(ii) of the Common Crop Insurance Basic Provisions, haying or grazing a cover crop will not impact eligibility for a prevented planting payment provided such action did not contribute to the acreage being prevented from planting.

Special Provisions of Insurance

2014 and Succeeding Crop Years

Year: 2014

Commodity: Potatoes (0084)

State: Florida (12)

Date: 8/21/2013

Plan: APH (90)

County: Suwannee (121)

Type

- *5 Recommended and adapted yellow skinned varieties such as Yukon Gold, will be considered insurable as the white type and will be designated as the white type for the purposes of this policy.

Practice

- *6 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

Insurance Availability

Nematode damage will not be an insurable cause of loss unless a recommended preplant nematocide treatment of the soil is administered for the current crop year.

For acreage that requires a written agreement for insurability per Section 9(a)(1)(iv) of the Basic Provisions (new breaking written agreement), the written agreement request must be submitted by the applicable sales closing date in lieu of section 18(e)(2)(i)(B) and in accordance with section 18(e)(2)(iii).

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS guidelines. If growing conditions warrant a deviation from the guidelines, producers should contact either Extension or the local NRCS for management guidance. For information on cover crop management and termination guidelines, refer to the Cover Crop Termination Guidelines published at <http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/landuse/crops/>.

Quality

With regard to Grade Inspections and the respective U.S. Grade Standard (i.e. Processing, Chipping, Seed and all other Potatoes), the only size modifications recognized are those instituted by State or Federal Marketing Orders.
