T/P 9	Late Season (Fresh) 109 *5 *6 *7	Organic(Transitional) Irr. 712 *8

Statement

General

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

In addition to, or instead of, establishing optional units by non contiguous land, optional units may be established by type as provided by section 2(b) of the Stonefruit Crop Provisions.

Any variety not listed will be insured under the early season type.

Practice

- *8 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

Special Provisions of Insurance

2014 and Succeeding Crop Years

Year: 2014	Commodity: Plums (0092)	State: California (06)
Date: 7/25/2013	Plan: APH (90)	County: Tulare (107)

Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

Insurance Availability

Interspecific plum varieties not listed on the Special Provisions shall be insured as Early Season type. Aprium and plumcot hybrids are not insured under the Stonefruit Crop Provisions.

Grade standards for the crop: U. S. No. 1, unless further modified by State or Federal Marketing Order, when applicable. For Pluots, marketable production shall also include fruit with defect & damage scores equivalent to or less than those for U.S. No. 1.

Quality

In addition to section 11(c)(4) of the Stonefruit Crop Provisions, for harvested production subtract the Harvest Cost dollar amount shown on the Prices Tab of the Actuarial Information Browser from the price received by the insured to adjust for costs incurred for harvest and delivery; ensure all values are expressed in the commodity's unit of measure. The cost adjustment for harvest and delivery shall not be deducted from the fruit's value when the insured does not incur such expense or if such costs are not customary for the insured stonefruit crop.
