T/P 6	All Varieties 999	Organic(Transitional) Irr. 712

Statement

General

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

In accordance with section 13(c)(2)(ii) of the Pecan Revenue Crop Provisions, the catastrophic risk protection factor will be fifty-five percent (.55).

For purposes of CAT, coverage will be equal to the approved average revenue times 27.5 percent.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Practice

Acreage, production, and revenue history from certified organic or transitional acreage will be contained in separate approved revenue history databases by practice. Each database will include acreage, production, and revenue from any applicable buffer zone. Any yearly average approved revenues, for the most recent four crop years only, from the transitional acreage database will be used in place of the applicable T-revenue in two year increments to establish the certified organic APH database. The T-revenue provided in the actuarial documents for the current coverage module will be used to complete the database, if required.

Special Provisions of Insurance

2014 and Succeeding Crop Years

Year: 2014	Commodity: Pecans (0020)	State: Georgia (13)
Date: 8/21/2013	Plan: Pecan Revenue (41)	County: Grady (131)

Price

AMS prices can be found using the AMS Market News search at <http://search.ams.usda.gov/mnsearch/mnsearch.aspx>. To search by report number, enter the applicable two digit state code in the first field, the code FV for fruit and vegetables in the second field, and the code 140 for pecans in the third field. The applicable state codes are: US for Texas; IX for Arizona, New Mexico and West Texas; KO for Oklahoma; TV for Georgia; and BO for Louisiana. If an AMS report is not available for your area, use the report from the nearest area. If neither AMS prices nor local market prices are available for the week that the pecans were harvested, use the most recent AMS report for your area or the area nearest to you if a report is not available for your area to determine the market price.

Insurance Availability

Pecans previously interplanted with peaches are insurable in this county.

Pursuant to section 8(g)(2) of the Pecan Revenue Crop Provisions, direct marketed pecans are insurable.

Pursuant to section 8(d) of the Pecan Revenue Crop Provisions, trees which have been "spaded" and relocated will be considered to have been "topworked" and insurable under this provision.
