Statement

General

SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1; for acreage planted after June 30, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred (i.e., planted September 2003 enter 2004).

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year; e.g., if 2004 is the year insurance is in effect and the tress/vines were set out in April of 1997, then the leaf year is derived as follows: 2004 minus 1997 plus 1 equals 8.

Grafted acreage will have the following percentages of the applicable T-Yield corresponding to the LEAF YEAR and SET OUT YEAR of initial planting:

Density (trees/acres)	1st year after grafting	2nd year after grafting	3rd year after grafting	4th year after grafting	5th year after grafting
0-299	0%	30%	60%	90%	100%
300 & greater	10%	50%	70%	100%	100%

Special Provisions of Insurance 2015 and Succeeding Crop Years

Year: 2015

Commodity: Apples (0054)

State: Oregon (41)

Date: 7/21/2014

Plan: APH (90)

County: Washington (067)

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Type

In accordance with section 2(b) of the Apple Crop Provisions, you may divide a unit into optional units by type; however, you may not establish an optional unit for type "Fresh 111" in combination with an optional unit for a type identified as a Varietal Group in the actuarial documents. For each unit for which you qualify, you may not report type "Fresh 111" if you also report a type identified as a Varietal Group in the actuarial documents.

- *5 Varietal Group A insurable varieties: Honeycrisp and Sweetango/Minneiska. Varietal Group A will include all commercially recognized selections and brand names, mutations, or sports; but, does not include hybrids created by crosses between the stated variety and any other varieties.
- *6 Varietal Group B insurable varieties: Ambrosia, Aurora Golden Gala, Fuji, Gala, Golden Supreme, Jazz, Pinata, and Cripps Pink (Pink Lady). Varietal Group B will include all commercially recognized selections and brand names, mutations, or sports; but, does not include hybrids created by crosses between the stated variety and any other varieties.
- *7 Varietal Group C insurable varieties: All other Apple varieties not specified in Group B or Group A if applicable.

Practice

- *8 Acreage and production history from certified organic or transitional acreage will be contained in separate APH databases. Each APH database will include production and acreage from any applicable buffer zone. Any yearly average APH yields, for the most recent four crop years only, from the transitional acreage database will be used in place of Transitional Yields (T-yields) to establish the certified organic APH database. A variable T-yield will be used to complete the database, if required.

Date

In accordance with section 9(a)(3), the calendar date for the end of insurance period for each crop year is November 10 for the Fuji variety.

The production reporting date will be the acreage reporting date.

Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.
