Statement

General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In accordance with the Basic Provisions, the administrative fee is \$30.

- *3 In addition to Section 7(a)(2)(ii) of the Basic Provisions, if you insure any non-irrigated acreage with an intended use of haying, you may only select a productivity factor of 60 percent for the county, crop, and intended use.
- *4 In addition to Section 4(b)(2) of the crop provisions, if you report any non-irrigated land with an intended use of haying, upon our request, you must substantiate the acreage is suitable for haying by either providing documentation that such acreage has been hayed in the past or by providing a determination by an agricultural expert that the acreage is physically suitable for haying. We will not insure any hay land that is determined by an agriculture expert, as defined in the Rainfall and Vegetation Index Plan Common Policy, as not being suitable for haying. Land determined under this section to be unsuitable for haying can be insured for grazing provided the livestock requirement is met.
