SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

DEFINITION OF WITH FROST PROTECTION OPTION - Applicable only to acreage adequately protected by frost protection equipment. This includes serviceable wind machines that provide a minimum of 7 propeller horsepower per acre. Regardless of horsepower, one wind machine can service no more than ten acres. The adequacy of the frost protection equipment for a unit will be determined by the Corporation.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

A variable T-yield will be used to complete the database, if required.
