Statement

General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In lieu of the second sentence of Section 24(a) of the Basic Provisions, for the purpose of premium amounts owed to us or administrative fees owed to FCIC, interest will start to accrue on the first day of the month following the issuance of the notice by us, provided that a minimum of 30 days have passed from the premium billing date specified in the Special Provisions.

Type

Cabbage to be marketed as coleslaw will be considered to be fresh-market cabbage and will be insurable as the fresh practice or type, as applicable.

Price

The maximum amount of the replanting payment per acre is 45 hundredweight for transplanting.

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

Premium

In lieu of section 7(h)(2)(i) of the Basic Provisions, notwithstanding section 7(h)(2) of the Basic Provisions, if you demonstrate you began farming for the first time after June 1 but prior to the beginning of the reinsurance year (July 1), you may be eligible for premium subsidy the subsequent reinsurance year without having form AD-1026 on file with FSA on or before June 1. For example, if you demonstrate you started farming for the first time on June 15, 2015, you may be eligible for premium subsidy for the 2016 reinsurance year without form AD-1026 on file with FSA.

Special Provisions of Insurance

2017 and Succeeding Crop Years

Year: 2017

Commodity: Cabbage (0072)

State: Florida (12)

Date: 3/21/2016

Plan: APH (90)

County: Hillsborough (057)

Insurance Availability

Savoy cabbage and Chinese cabbage, including other Oriental greens, are not insurable.

Insurance will not attach to any acreage planted to cabbage or any other Brassicaceae crop (e.g., cauliflower, broccoli, etc.) which was infected the previous year with a 10 percent or greater infestation of sclerotinia. NOTE: The Brassicaceae family was formerly known as the Cruciferae or crucifer family.

Insurance will not attach to any acreage on which Clubroot was present in any of the previous 10 years unless the soil pH is 7.2 or higher at the beginning of the crop season. The soil pH must be documented with an approved soil test according to Extension Service recommendations.

Insurance will not attach on any cabbage planted to ground treated with Aldicarb (Temik) within the last six (6) months.

Direct marketed cabbage is insurable.

For acreage that requires a written agreement for insurability per Section 9(a)(1)(iv) of the Basic Provisions (new breaking written agreement), the written agreement request must be submitted by the applicable sales closing date in lieu of section 18(e)(2)(i)(B) and in accordance with section 18(e)(2)(iii).

You must provide written verification of acreage data from the acreage reports previously recorded for crop insurance purposes, or from the Farm Service Agency or the Extension Service, to the company representative by the time of application if you are a new insured or by the sales closing date if you are a carry-over insured. If your acreage of insurable cabbage types in this county for the current crop year exceeds 125 percent of the greatest number of acres of insurable cabbage types that you produced in this county for any one of the three previous years, your production guarantee (per acre) for the current crop year will be reduced as follows: (a) Multiply the greatest number of acres of insurable cabbage types that you produced in this county in any one of the three previous crop years by 1.25; (b) Divide the result by the number of acres of insurable cabbage types produced by you in this county in the current crop year; and (c) Multiply the resulting factor (not to exceed 1.0) by the production guarantee (per acre) for the current crop year. For purposes of this statement, a new producer is a producer who has never grown cabbage in this county. If you are a new producer or if you have not grown commercial fresh cabbage in one of the last three years and your acreage of insurable cabbage types in this county for the current crop year exceeds five acres, your production guarantee (per acre) for the current crop year will be reduced as follows: (a) Divide 5 acres by the number of acres of insurable cabbage types produced by you in this county in the current crop year; and (b) Multiply the resulting factor (not to exceed 1.0) by the production guarantee (per acre) for the current crop year. All production from your total acreage of insurable cabbage types produced in this county in the current crop year will be counted in the event of a loss. This limitation will not apply to: (a) An acreage increase of five or less acres; or (b) Any acreage of processing cabbage under contract that is insurable under the processing practice. This applies to all acreage in the county for the crop year.
