**Statement**

**General**

Acreage of coffee trees considered dead due to an infestation of nematodes diagnosed by the University of Hawaii or the State of Hawaii Department of Agriculture must be fallowed for one year following the chipping and mulching or removal of the infected trees and the application of a recommended soil treatment to the affected acreage.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

**Price**

Use 55% of the tree reference price for the appropriate stage, round up to the next cent when calculating the amount of protection per unit and the unit value for catastrophic coverage (CAT) policies.
