Statement

General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In lieu of Section 17(f)(5)(ii) of the Common Crop Insurance Basic Provisions, haying or grazing a cover crop will not impact eligibility for a prevented planting payment provided such action did not contribute to the acreage being prevented from planting.

Type

- *3 Recommended and adapted yellow skinned varieties such as Yukon Gold, will be considered insurable as the white type and will be designated as the white type for the purposes of this policy.

Special Provisions of Insurance 2017 and Succeeding Crop Years

Year: 2017

Commodity: Potatoes (0084)

State: Missouri (29)

Date: 8/1/2016

Plan: APH (90)

County: Mississippi (133)

Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

Insurance Availability

Crystal, Kennebec or Sebago varieties are insurable only by written agreement. Contact your crop insurance agent to determine eligibility requirements.

For acreage that requires a written agreement for insurability per Section 9(a)(1)(iv) of the Basic Provisions (new breaking written agreement), the written agreement request must be submitted by the applicable sales closing date in lieu of section 18(e)(2)(i)(B) and in accordance with section 18(e)(2)(iii).

Any loss of production due to scab will not be an insurable cause of loss on any land with prior history of scab.

Insurance will not attach to any acreage on which potatoes were planted in each of the four previous crop years.

Nematode damage will not be an insurable cause of loss unless a recommended preplant nematocide treatment of the soil is administered for the current crop year.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS guidelines. If growing conditions warrant a deviation from the guidelines, producers should contact either Extension or the local NRCS for management guidance. For information on cover crop management and termination guidelines, refer to the Cover Crop Termination Guidelines published at <http://www.nrcs.usda.gov/wps/portal/nrcs/main/national/landuse/crops/>.

Quality

With regard to Grade Inspections and the respective U.S. Grade Standard (i.e. Processing, Chipping, Seed and all other Potatoes), the only size modifications recognized are those instituted by State or Federal Marketing Orders.
