**Statement**

**General**

Inspection and Acceptable Records:

In accordance with section 11(d)(2)(ii) of the applicable pilot crop provisions, acceptable records of direct marketed production are:

Daily pick records that meet the requirements in the Crop Insurance Handbook (Section 1421 B. Pick Records) or:

1. Daily farm log that includes quantity sold and price received on a unit basis; or
2. Pick records with pickers identification number and amount picked daily on a unit basis; or
3. Cash register receipt with quantity sold and price received on a unit basis.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

**Price**

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

**Insurance Availability**

If the acreage has been infested with nematodes as named in the applicable pilot crop provisions and the infestation has been verified by the University of Hawaii through tests conducted by them, the infected trees must be removed from the field, the appropriate soil treatment applied, and the affected acreage fallowed for one year from the date the soil treatment was completed before insurance will attach, unless nematode resistant transplants were used.
