Statement

General

RMA will announce the prune reference date and average number of dry prunes per pound prior to July of the current crop year.

SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

The following varieties are insurable under the Prune Crop Provisions: French; Muir beauty; and Sutter.

Special Provisions of Insurance

2017 and Succeeding Crop Years

Year: 2017

Commodity: Prunes (0036)

State: California (06)

Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.
