### Price

Use 55% of the reference maximum price for the appropriate stage and restoration method (RM1 or RM2), round up to the next cent when calculating the amount of protection per unit and the unit value for catastrophic coverage (CAT) policies.

### Insurance Availability

In accordance with section 11 of the Pecan Tree Crop Provisions, drought is an insurable cause of loss for pecan trees insured under a non-irrigated practice if:

1. The insured's Pecan Tree Insurance Policy is in force for three crop years including the crop year of application. For example: The crop year of application is the 2018 crop year. Drought will be a cause of loss on insured acreage listed on the insured's 2018 crop year acreage report beginning with the 2021 crop year of the insured's policy.
2. Insurable pecan tree acreage added to the insured's operation in any crop following the crop year of application will be subject to a three crop year waiting period beginning with the crop year the acreage is added before drought will be a cause of loss for such acreage.
3. The trees in the unit have a trunk diameter not less than 20.01 inches.
4. For each insurable block, the number of trees per acre for the stage does not exceed the maximum number of trees shown in the following table:

Western Region	
	Trees/Acre*
Stage V	13

\*Includes native and seedling blocks

5. We inspect the trees before July 1 and determine the trees are not damaged due to drought or any other cause and we accept the trees.

## Special Provisions of Insurance 2020 and Succeeding Crop Years

Year: 2020

Commodity: Pecan Trees (0284)

State: Texas (48)

Date: 12/20/2018

Plan: Tree Based Dollar Amount Of Insurance (40)

County: San Saba (411)

In accordance with the Pecan Tree Crop Provisions as contained in:

1. Section 8(a)(6), an insurable orchard will be a commercial orchard:
  - a. Containing at least 5 acres of an insurable pecan tree variety including seedling trees; or
  - b. Native pecan trees containing at least 20 acres of insurable pecan trees.
2. Section 9(b), an insurable block, as defined in section 1 of the Crop Provisions, must contain a number of insurable trees per acre equal to or greater than the minimum number of trees shown in the table below for each stage.

Western Region

Variety (improved) - Seedling Trees	Trees/Acre	Native Trees	Trees/Acre
Stage I	18	Stage I	10
Stage II	18	Stage II	10
Stage III	18	Stage III	10
Stage IV	13	Stage IV	7
Stage V	4	Stage V	4

If the block contains more than one stage, the minimum number trees for the block will be a weighted average of the minimum tree number shown in the table for each stage (rounded to the nearest whole tree). For example, the block contains 1,000 native trees: 600 stage III trees (60%); 300 stage IV trees (30%); and 100 stage V trees (10%). The minimum number of trees/acre for the block is 9  $[(10 \times .60) + (7 \times .30) + (4 \times .10) = 8.5]$ .
