Statement

General

For the purpose of section 12(d)(1)(iii) of the Southern & Central Potato Crop Provisions, the date potatoes would have reached full maturity will be 100 days after the date of planting or replanting.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In lieu of Section 17(f)(5)(ii) of the Common Crop Insurance Basic Provisions, haying or grazing a cover crop will not impact eligibility for a prevented planting payment provided such action did not contribute to the acreage being prevented from planting.

Type

- *4 Varieties insurable as Group B: Russets, chipper (processing) varieties, and all white and yellow varieties for which coverage is not provided for in Group A.
- *5 Varieties insurable as Group A: LaChipper, Mainstay, Sebago, Superior, Yellow Star, Fabula, Satina, Vivaldi, Yukon Gold, and all red varieties. Additionally, other varieties of table stock potatoes may be insurable under the Group A Type by written agreement provided that: 1) The variety is documented to be a table stock variety which is adapted to the area and able to produce at least the county T-Yield for Group A type; and 2) The insured controls a packing facility capable of packing, grading, and handling potatoes for the fresh market or has a packing contract executed with a table stock potato packer whereby the packer agrees to accept and pack the production specified in the contract.

Special Provisions of Insurance

2019 and Succeeding Crop Years

Year: 2019	Commodity: Potatoes (0084)	State: Florida (12)
Date: 8/24/2018	Plan: APH (90)	County: Flagler (035)

Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

Insurance Availability

Nematode damage will not be an insurable cause of loss unless a recommended preplant nematocide treatment of the soil is administered for the current crop year.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS guidelines. If growing conditions warrant a deviation from the guidelines, producers should contact either Extension or the local NRCS for management guidance. For information on cover crops and crop insurance and the Cover Crop Termination Guidelines go to <http://www.rma.usda.gov/news/currentissues/covercrops/>.

Quality

With regard to Grade Inspections and the respective U.S. Grade Standard (i.e. Processing, Chipping, Seed and all other Potatoes), the only size modifications recognized are those instituted by State or Federal Marketing Orders.
