Statement

General

SET OUT YEAR AND LEAF YEAR

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Protective Cover Option: The protective cover option is a premium rate discount applicable only to late harvest table grape types with an end of insurance date of October 31 or later adequately protected by a plastic cover. Adequate protection means the placement of a plastic film cover over the grape vines starting at one end of the trellis and continuing uninterrupted to the other end, securely tied down. If we determine that rain protection was not properly utilized or not properly reported, the indemnity for the unit will be reduced by the percentage of premium reduction allowed for the rain protection option. You must, at our request, provide us with records showing the purchase of rain protection for acreage on which the protection was applied. An insured may elect the protective cover option on or before the acreage reporting date. This option is continuous once elected, unless canceled by the cancellation date provided by the crop provision.

Adora, Autumn Crisp, Autumn King, Crimson Seedless, Red Globe, Scarlotta, Sweet Scarlet	November 30

Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

Insurance Availability

Insurable age of vines: Fourth growing season after being set out. Third growing season after being grafted.

Any acreage that is interplanted with another perennial crop is insurable unless we inspect the acreage and determine that it does not meet the requirements contained in your policy.
