Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In lieu of section 6(b) of the Basic Provisions, you may only choose a protection factor of 120 percent for catastrophic risk protection. However, in accordance with section 8(m) of the Basic Provisions, if you do not submit a production report to us by the production reporting date specified in the actuarial documents, your protection factor for your catastrophic risk protection policy in the following crop year will be limited to the lowest protection factor available.

Refer to the Prices and Yields tab of these actuarial documents for the date final county revenues and final county yields will be determined. The payment will be issued no later than 30 days after final county revenues and final county yields are determined.

 2. Any plant growth, including weeds, volunteer crops, existing perennial vegetation (including Conservation Reserve Program acreage), must be terminated a full crop year before planting a crop, and
 3. Any additional plant re-growth must be terminated on or before June 1, and any later plant growth (e.g. weeds, volunteer crop) must be controlled by mechanical or chemical means.
