Special Provisions of Insurance

2022 and Succeeding Crop Years

Year: 2022

Commodity: Tangerine Trees (0193)

State: Texas (48)

Date: 6/16/2021

Plan: Tree Based Dollar Amount Of Insurance (40)

County: Cameron (061)

General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Frost Protection Premium Discount Requirements: To qualify for frost protection discounts specified on the actuarial documents, the insured must control and maintain an Irrigation system customary for frost protection in the area and capable of applying at least two thousand (2,000) gallons of water per hour per acre directly to the trunks and lower limbs of the trees within the protective area (the area within three (3) feet of the trunk at a height of three and one-half (3.5) feet).

Partial Damage Factors:

Stage I	0.750
Stage II	0.470
Stage III	0.390

In accordance with section 2(b)(2) of the Texas Citrus Tree Crop Provisions, the minimum distance and acreage required to qualify a separate grove as an optional unit are one (1) mile and ten (10) acres. The distance requirement between optional units will be established based on the closest location of between separate groves. Any groves that are within a one-mile distance of each other will be combined into a single optional unit. A separate grove meeting the distance requirement but with less than 10 acres will be combined with the nearest optional unit. Additional optional units for separate grove locations may be established in accordance with FCIC approved procedures.

Price

Use 55% of the tree reference price for the appropriate stage, round up to the next cent when calculating the amount of protection per unit and the unit value for catastrophic coverage (CAT) policies.

Insurance Availability

The insured may elect either the Coverage Enhancement Option or the Occurrence Loss Option under the Texas Citrus Tree Crop Insurance Program, but not both.
