Statement

General

For the purpose of section 12(d)(1)(iii) of the Southern & Central Potato Crop Provisions, the date potatoes would have reached full maturity will be 100 days after the date of planting or replanting.

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

In addition to the production reporting requirements in section 3(f) of the Basic Provisions, you must report, as specified in FCIC procedures, your current year's production on our form on the same basis used to establish your approved yield(s). The current year's production must be reported by one year (365 days) following the production reporting date contained in the actuarial documents. This production report will be used to meet the production reporting requirements in section 3(f) of the Basic Provisions for the following crop year, if there are no changes in the basis used to establish your approved yield. Your current year's production report is also subject to section 3(g) of the Basic Provisions.

Written Agreements

- *2 In accordance with section 8 of the Basic Provisions, insurance shall not attach to planted acres intended to be harvested as creamer size potatoes, unless provided by written agreement.

Special Provisions of Insurance

2023 and Succeeding Crop Years

Year: 2023	Commodity: Potatoes (0084)	State: Florida (12)
Date: 8/9/2022	Plan: APH (90)	County: Putnam (107)

Type

- *6 Varieties insurable as Group B: Russets, chipper (processing) varieties, and all white and yellow varieties for which coverage is not provided for in Group A.
- *7 Varieties insurable as Group A: LaChipper, Mainstay, Sebago, Superior, Yellow Star, Fabula, Satina, Vivaldi, Yukon Gold, and all red varieties. Additionally, other varieties of table stock potatoes may be insurable under the Group A Type by written agreement provided that: 1) The variety is documented to be a table stock variety which is adapted to the area and able to produce at least the county T-Yield for Group A type; and 2) The insured controls a packing facility capable of packing, grading, and handling potatoes for the fresh market or has a packing contract executed with a table stock potato packer whereby the packer agrees to accept and pack the production specified in the contract.

Price

If a contract price is available as shown in the actuarial documents, you may elect to have your price election determined in accordance with the Contract Price Addendum (CPA). If the crop provisions or special provisions provide a method to determine a contract price your price election will be determined in accordance with the crop provisions or special provisions and the CPA does not apply.

Insurance Availability

Nematode damage will not be an insurable cause of loss unless a recommended preplant nematocide treatment of the soil is administered for the current crop year.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Quality

With regard to Grade Inspections and the respective U.S. Grade Standard (i.e. Processing, Chipping, Seed and all other Potatoes), the only size modifications recognized are those instituted by State or Federal Marketing Orders.
