**Statement**

**General**

**SET OUT YEAR AND LEAF YEAR**

The SET OUT YEAR for APH reporting purposes is the actual calendar year for acreage planted before July 1st. For acreage planted on or after July 1st, the SET OUT YEAR shall be the year following the calendar year in which set out actually occurred.

To determine LEAF YEAR subtract the set out year from the calendar year of insurance (or APH crop year for the yield substitution purposes), then add one year.

## Special Provisions

### 2023 and Succeeding Crop Years

Year: 2023	Commodity: Grapes (0053)	State: California (06)
Date: 10/25/2022	Plan: APH (90)	County: Kings (031)

In lieu of the definition in section 1 of the Grape Crop Provisions, harvest will be defined as, "Removing of the mature grapes from the vines or severing the canes or vines for dried-on-vine raisin production."

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

In addition to the production reporting requirements in section 3(f) of the Basic Provisions, you must report, as specified in FCIC procedures, your current year's production on our form on the same basis used to establish your approved yield(s). The current year's production must be reported by one year (366 days) following the production reporting date contained in the actuarial documents. This production report will be used to meet the production reporting requirements in section 3(f) of the Basic Provisions for the following crop year, if there are no changes in the basis used to establish your approved yield. Your current year's production report is also subject to section 3(g) of the Basic Provisions.

#### Price

In accordance with section 3(d) of the Grape Crop Provisions, the price(s) contained in your grape contract(s) may be used for your price election, with the following stipulations:

(A) A grape type (variety) may be insured using a contract price if: (1) the contract price option is elected by sales closing date; (2) a written contract is in effect between the producer and a winery or a processor for the current crop year; (3) the contract states an amount that will be paid per ton or per acre; (4) the contract states the number of tons or acres contracted; (5) a copy of the contract(s) is provided to us no later than the acreage reporting date (the contract price in contracts received after the acreage report date will not be used); and (6) acreage is insured at a buy-up level of coverage. Production from acreage that does not meet these stipulations will be considered non-contracted.

(B) The contract price(s) used to compute your price election will be without regard to incentives or discounts. In no case may the contract price be greater than the Maximum Contract Price provided in the actuarial documents for the applicable grape type (variety), and organic practice. Contracts stated in dollars per acre must be converted to dollars per ton by dividing the dollars per acre by the approved yield.

(C) To determine the contracted and non-contracted tons, the expected tons will be calculated by multiplying the approved yield by the number of acres insured. (1) For a production only based contract, the tons under contract will be the lesser of the expected tons, or the number of tons stated in the contract. (2) For an acreage only based contract, the tons under contract will be the lesser of expected tons, or the number of tons determined by multiplying the acres stated in the contract by the approved yield. (3) For an acreage and production based contract, the tons under contract will be the lesser of the following: the expected tons, the number of tons stated in the contract, or the number of tons determined by multiplying the acres stated in the contract by the approved yield.

(D) A weighted average price of contracted and non-contracted production will be computed and used as your price election for each distinct grape type (variety) and organic practice combination by: (1) multiplying the contract price(s) per ton by the number of tons associated with the price(s) as determined in paragraph (C) above; (2) multiplying the price election found in the actuarial documents by the number of non-contracted tons, if any (non-contracted tons equal the expected tons less any contracted tons); (3) adding together the results of items (1) and (2); and (4) dividing the result of item (3) by the expected tons.

In accordance with Section 15(d) of the Basic Provisions, the price used to compute your indemnity on unharvested acreage will be the price election minus the harvest costs amount as provided within the Prices Tab of these Actuarial Documents.

#### Premium

Any acreage in this county with a map area designation on the actuarial map will identify either a crush district or high risk/unrated area in accordance with the high risk rates table and/or the type availability table.

**Special Provisions**  
**2023 and Succeeding Crop Years**

Year: 2023

Commodity: Grapes (0053)

State: California (06)

Date: 10/25/2022

Plan: APH (90)

County: Kings (031)

**Insurance Availability**

Insurable age of vines: Fourth growing season after being set out. Third growing season after bench-grafted vines are set out. Third growing season after field grafted.
