General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Price

Contract price:

You may use a contract price to determine your insurance guarantee when a contract price code of ~~Yes~~ exists on the Prices tab in the actuarial documents for the crop, type, and practice.

Contract price authority (i.e., rules governing the use of contract prices and the method to determine a contract price) will be found in one of the following three places, listed in priority order:

1. Special Provisions, separate from this statement, which authorizes the use of the Contract Price Addendum (CPA);
2. Crop Provisions; or

Special Provisions 2024 and Succeeding Crop Years

Year: 2024
Date: 11/15/2023
Commodity: Safflower (0049)
Plan: APH (90)

Use All or Part of Acreage
County: Slope (087)

3. CPA.

When the contract price code is ☐ Yes ☒ No on the Prices tab for the crop, type, and practice:

1. If the Crop Provisions or Special Provisions provide the contract price authority, your price will be determined in accordance with the Crop Provisions or Special Provisions. If neither the Crop Provisions or Special Provisions provide contract price authority, your price will be determined in accordance with the CPA; and
2. The Crop Provisions or Special Provisions may only provide contract price authority for specific types or practices. When this occurs, the CPA may be used to determine a contract price for other types or practices where contract price authority is not provided through the Crop Provisions or these Special Provisions.

Insurance Availability

In accordance with section 9(a)(1)(iv) in the Common Crop Insurance Policy Basic Provisions (Basic Provisions), acreage that has not been planted and harvested or insured (including insured acreage that was prevented from being planted) in at least one of the three previous crop years or acreage where the only crop that has been planted and harvested in one of the three previous crop years was a cover, hay, or forage crop (hereinafter referred to as new breaking acreage) is insurable at 80 percent of the applicable published county T-Yield in the actuarial documents without a written agreement if all of the following requirements 1 through 4 below are met. New breaking acreage is insurable at 65 percent of the applicable published county T-Yield in the actuarial documents without a written agreement if only requirements 1, 2, and 4 below are met.

1. The policyholder must provide documentation that 75 percent or more of the new breaking acreage by field (or within an existing field if only a portion of the field is new breaking acreage) is composed of soil types defined as Capability Class I, II, III, or IV as determined by the Natural Resources Conservation Service (NRCS) Web Soil Survey (<http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm>);
2. The policyholder must certify that the new breaking acreage was broken out or chemically destroyed on or before November 30 prior to planting;
3. The policyholder must provide documentation that the new breaking acreage has been previously broken and planted to a crop. This documentation must show that to February 7, 2014, showing the prior crop that the new breaking acreage was planted to; a FSA-578 document dated on or prior to February 7, 2014, showing that the
4. If NRCS requires a Conservation Plan on the new breaking acreage, the policyholder must provide documentation that one is, or will be, in place. If NRCS does not require a Conservation Plan on the new breaking acreage, the producer must certify that one is not required.

Up to and including 320 acres of new breaking acreage per county (on a whole field basis), that meet the requirements above, may be insurable under this Special Provisions statement for the policyholder/entity per each sales closing date (for example, a total of 320 acres or less of new breaking acreage for crops with a September 30 sales closing date and total of 320 acres or less of new breaking acreage for crops with a March 15 sales closing date). Any new breaking acreage (on a whole field basis) that meets the requirements above and exceeds the 320-acre limitation will require a written agreement to establish insurability (only the acreage that

Special Provisions
2024 and Succeeding Crop Years

Year: 2024 Commodity: Safflower (0049) Use: 100% Crop Insurance
Date: 11/15/2023 Plan: APH (90) County: Slope (087)

exceeds 320 acres requires a written agreement, up to 320 acres may be approved under this Special Provisions statement even if the producer has more than 320 new breaking acres in the county).

Underwriting Standards:
The producer must provide the applicable documentation and certification described in requirements 1 through 4 above to the Approved Insurance Provider (AIP) on or before the acreage reporting date for insurability of such new breaking acreage. If the above requirements are met and the described documentation and certification is provided to the AIP by the acreage reporting date, the new breaking acreage will be insurable using the appropriate percentage (65 percent or 80 percent) applied to the applicable published county T-Yield in the actuarial documents (simple average T-Yields, new producer T-Yields, and variable T-Yield percentages do not apply). A producer may elect to insure new breaking acreage at 80 percent of the applicable published county T-Yield in the actuarial documents and non-native sod new breaking acreage insurable at 65 percent of the applicable published county T-Yield in the actuarial documents, standard APH procedure will apply provided the acreage is insurable under the terms of the Basic Plan. The producer must maintain separate records for the first four crop years of planting on the new breaking acreage. Additionally, new breaking acreage will not be eligible for prevented planting coverage the initial crop year it is insured under this Special Provisions statement.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at https://www.rma.usda.gov/en/Topics/Cover-Crops.

Quality

GENERAL STATEMENTS:

Underwriting Standards:
The producer must provide the applicable documentation and certification described in requirements 1 through 4 above to the Approved Insurance Provider (AIP) on or before the acreage reporting date for insurability of such new breaking acreage. If the above requirements are met and the described documentation and certification is provided to the AIP by the acreage reporting date, the new breaking acreage will be insurable using the appropriate percentage (65 percent or 80 percent) applied to the applicable published county T-Yield in the actuarial documents (simple average T-Yields, new producer T-Yields, and variable T-Yield percentages do not apply). A producer may elect to insure new breaking acreage at 80 percent of the applicable published county T-Yield in the actuarial documents and non-native sod new breaking acreage insurable at 65 percent of the applicable published county T-Yield in the actuarial documents, standard APH procedure will apply provided the acreage is insurable under the terms of the Basic Plan. The producer must maintain separate records for the first four crop years of planting on the new breaking acreage. Additionally, new breaking acreage will not be eligible for prevented planting coverage the initial crop year it is insured under this Special Provisions statement.

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

Underwriting Standards:
The producer must provide the applicable documentation and certification described in requirements 1 through 4 above to the Approved Insurance Provider (AIP) on or before the acreage reporting date for insurability of such new breaking acreage. If the above requirements are met and the described documentation and certification is provided to the AIP by the acreage reporting date, the new breaking acreage will be insurable using the appropriate percentage (65 percent or 80 percent) applied to the applicable published county T-Yield in the actuarial documents (simple average T-Yields, new producer T-Yields, and variable T-Yield percentages do not apply). A producer may elect to insure new breaking acreage at 80 percent of the applicable published county T-Yield in the actuarial documents and non-native sod new breaking acreage insurable at 65 percent of the applicable published county T-Yield in the actuarial documents, standard APH procedure will apply provided the acreage is insurable under the terms of the Basic Plan. The producer must maintain separate records for the first four crop years of planting on the new breaking acreage. Additionally, new breaking acreage will not be eligible for prevented planting coverage the initial crop year it is insured under this Special Provisions statement.

Special Provisions
2024 and Succeeding Crop Years

Year: 2024
Date: 11/15/2023

Commodity: Safflower (0049)
Plan: APH (90)

Unit: 1000 bushels
County: Slope (087)

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For production qualifying under sections B or C (except for production qualifying under section C3) that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the applicable DFs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.

At any time during this delay in settlement, you may request to settle your claim for any unsold production using the applicable DFs.

- a. For any production sold to other than a disinterested third party, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.
- b. If the production is later sold, we will not recalculate or adjust your claim for indemnity.
- c. If the time to harvest has been extended as stated below, this option will not apply beyond 60 days after the calendar date for the EOIP.

1. OPTION TO DELAY CLAIM SETTLEMENT:

- a. On the date of final inspection for the unit, if any of your unsold**** production qualifies for quality adjustment under sections B and/or C1 or C2a ii and C2a iv below, your claim will be settled using the applicable DFs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.
- b. At any time during this delay in settlement, you may request to settle your claim for any unsold production using the applicable DFs.
- c. For any production sold**** to other than a disinterested third party**, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.
- d. If the production is later sold, we will not recalculate or adjust your claim for indemnity.
- e. If the time to harvest has been extended as stated below, this option will not apply beyond 60 days after the calendar date for the EOIP.
- f. VOTER

Other discounts apply to the above discounts.

Special Provisions 2024 and Succeeding Crop Years

Ùcæ^kM̃P[!c@Öæ[æÇÌD

County: Slope (087)

substances or conditions in excess of the amount allowed by the lower of the following:

- [illegible]

- DFs for Vomitoxin:

Special Provisions 2024 and Succeeding Crop Years

Ùæ^kmp[!c@Oæ[æçHìD

County: Slope (087)

Vomitoxin Range	DF
0.0 - 1.0 ppm	.000
1.0 - 10.0 ppm	.450
10.1 ppm & above	See C3 below

2. For production containing substances or conditions, other than Vomitoxin, that qualifies under section C with an Aflatoxin level of 300 ppb or less, or other substances or conditions with a level less than the maximum allowable, adjust the production in the following manner.
- If on the date of final adjustment for the unit, the production was transported directly from the field to the buyer, or transported directly from the field and put into commercial storage without going into on farm storage, the DF will be:
 - For production sold to a disinterested third party prior to 60 days after the calendar date for the EOIP, the sum of all RIVs applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price.
 - $\frac{\text{RIV} \times \text{DF}}{\text{Market Price}} \times \text{DF}$ (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B2 above.
 - For unsold production containing Aflatoxin 60 days after the calendar date for the EOIP, the applicable DFs shown in the chart below in section C2b, added to the applicable DFs included in sections A or B2 above.
 - For unsold production containing all other mycotoxins or substances or conditions prior to 60 days after the calendar date for the EOIP (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B2 above.
 - For unsold production containing all other mycotoxins or substances or conditions 60 days after the calendar date for the EOIP, the DFs will be .500, added to the applicable DFs included in sections A or B2 above.
 - If on the date of final adjustment for the unit, the unsold production is in on-farm storage, is in commercial storage but was not transported directly from the field, was fed or utilized in any other manner, was in on-farm storage and has been sold, or was sold to other than a disinterested third party:
 - $\frac{\text{RIV} \times \text{DF}}{\text{Market Price}} \times \text{DF}$ (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B2 above.
 - $\frac{\text{RIV} \times \text{DF}}{\text{Market Price}} \times \text{DF}$ (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B2 above.
 - $\frac{\text{RIV} \times \text{DF}}{\text{Market Price}} \times \text{DF}$ (unless you elect to delay settlement as specified in the General Statements above), added to the applicable DFs included in sections A or B3 above.

DFs for Aflatoxin:

Special Provisions 2024 and Succeeding Crop Years

Year: 2024
Date: 11/15/2023

Commodity: Safflower (0049)
Plan: APH (90)

Use All: 100%
County: Slope (087)

Aflatoxin Range	DF
0.000 - 0.099 ppb	.000
0.100 - 0.199 ppb	.100
0.200 - 0.299 ppb	.200
0.300 - 0.399 ppb	.300
0.400 - 0.499 ppb	.400
300.1 ppb & above	See C3 below

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any substances or conditions qualifying under section C having a level exceeding the maximum amount allowed or when the edible portion of a crop is exposed to flood waters, a claim will not be completed for the unit, the following will apply (if such production is Zero Market Value, see section D):
- For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any substances or conditions qualifying under section C having a level exceeding the maximum amount allowed or when the edible portion of a crop is exposed to flood waters, a claim will not be completed for the unit, the following will apply (if such production is Zero Market Value, see section D):
 - The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
 - .500 for production that was in on-farm storage and was later sold, was in on-farm storage and was transported to commercial storage and later sold, and was not destroyed, more than 365 days after the calendar date for the end of the insurance period, such production will not be adjusted for any quality deficiencies listed in section C.
 - If production under Section C3 remains unsold, or is not destroyed, more than 365 days after the calendar date for the end of the insurance period, such production will not be adjusted for any quality deficiencies listed in section C.

ZERO MARKET VALUE PRODUCTION

For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any substances or conditions qualifying under section C having a level exceeding the maximum amount allowed or when the edible portion of a crop is exposed to flood waters, a claim will not be completed for the unit, the following will apply (if such production is Zero Market Value, see section D):

Special Provisions 2024 and Succeeding Crop Years

Ùæ^kmp[!c@a[æçD

County: Slope (087)

- [illegible]

* Local Market Price as defined in the applicable Basic, Crop, or these Provisions.

** %Disinterested third party-~~the~~ A person or business who does not routinely purchase production for resale or for feed will not be considered a disinterested third party if the RIVs applied by the buyer are not reflective of the RIVs in the local market.

*** Zero market value - A occurs when no buyers in your local area are willing to purchase the production and fair consideration to deliver production to a market outside your local marketing area (distant market) is equal to or greater than the production's value at the distant market or when acreage of an insured crop in which the edible portion of the crop has been exposed to flood waters.

**** %Sold-A Grain is considered sold on the date that final settlement between the buyer and seller has occurred and title of the grain has passed from the seller to the buyer.

*****	%Insold + Grain that does not meet the definition of %sold.
