General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Price

Contract price:

You may use a contract price to determine your insurance guarantee when a contract price code of ~~Yes~~ exists on the Prices tab in the actuarial documents for the crop, type, and practice.

Contract price authority (i.e., rules governing the use of contract prices and the method to determine a contract price) will be found in one of the following three places, listed in priority order:

1. Special Provisions, separate from this statement, which authorizes the use of the Contract Price Addendum (CPA);
2. Crop Provisions; or

Special Provisions 2024 and Succeeding Crop Years

Year: 2024
Commodity: Safflower (0049)
Date: 11/15/2023
Plan: APH (90)

Use: 0000
County: Harding (063)

3. CPA.

When the contract price code is yes on the Prices tab for the crop, type, and practice:

1. If the Crop Provisions or Special Provisions provide the contract price authority, your price will be determined in accordance with the Crop Provisions or Special Provisions. If neither the Crop Provisions or Special Provisions provide contract price authority, your price will be determined in accordance with the CPA; and
2. The Crop Provisions or Special Provisions may only provide contract price authority for specific types or practices. When this occurs, the CPA may be used to determine a contract price for other types or practices where contract price authority is not provided through the Crop Provisions or these Special Provisions.

Insurance Availability

Any acreage in this county without a rate or designated as uninsurable or unclassified on the actuarial map will be insurable only by written agreement, unless such acreage is otherwise classified in the actuarial documents. Contact your crop insurance agent by the sales closing date to determine eligibility requirements.

In accordance with section 9(a)(1)(iv) in the Common Crop Insurance Policy Basic Provisions (Basic Provisions), acreage that has not been planted and harvested or insured (including insured acreage that was prevented from being planted) in at least one of the three previous crop years or acreage where the only crop that has been planted and harvested in one of the three previous crop years was a cover, hay, or forage crop (hereinafter referred to as new breaking acreage) is insurable at 80 percent of the applicable published county T-Yield in the actuarial documents without a written agreement if all of the following requirements 1 through 4 below are met. New breaking acreage is insurable at 65 percent of the applicable published county T-Yield in the actuarial documents without a written agreement if only requirements 1, 2, and 4 below are met.

1. The policyholder must provide documentation that 75 percent or more of the new breaking acreage by field (or within an existing field if only a portion of the field is new breaking acreage) is composed of soil types defined as Capability Class I, II, III, or IV as determined by the Natural Resources Conservation Service (NRCS) Web Soil Survey (<http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm>);
2. The policyholder must certify that the new breaking acreage was broken out or chemically destroyed on or before November 30 prior to planting;
3. The policyholder must provide documentation that the new breaking acreage has been previously broken and planted to a crop. This documentation must show that to February 7, 2014, showing the prior crop that the new breaking acreage was planted to; a FSA-578 document dated on or prior to February 7, 2014, showing that the
4. If NRCS requires a Conservation Plan on the new breaking acreage, the policyholder must provide documentation that one is, or will be, in place. If NRCS does not require a Conservation Plan on the new breaking acreage, the producer must certify that one is not required.

Up to and including 320 acres of new breaking acreage per county (on a whole field basis), that meet the requirements above, may be insurable under this Special

Special Provisions 2024 and Succeeding Crop Years

Year: 2024

Upland Cotton (0001)

Date: 11/15/2023

Plan: APH (90)

County: Harding (063)

Provisions statement for the policyholder/entity per each sales closing date (for example, a total of 320 acres or less of new breaking acreage for crops with a September 30 sales closing date and total of 320 acres or less of new breaking acreage for crops with a March 15 sales closing date). Any new breaking acreage (on a whole field basis) that meets the requirements above and exceeds the 320-acre limitation will require a written agreement to establish insurability (only the acreage that exceeds 320 acres requires a written agreement, up to 320 acres may be approved under this Special Provisions statement even if the producer has more than 320 new breaking acres in the county).

Underwriting Standards:

The producer must provide the applicable documentation and certification described in requirements 1 through 4 above to the Approved Insurance Provider (AIP) on or before the acreage reporting date for insurability of such new breaking acreage. If the above requirements are met and the described documentation and certification is provided to the AIP by the acreage reporting date, the new breaking acreage will be insurable using the appropriate percentage (65 percent or 80 percent) applied to the applicable published county T-Yield in the actuarial documents (simple average T-Yields, new producer T-Yields, and variable T-Yield percentages do not apply). A producer who is insurable at 80 percent of the applicable published county T-Yield in the actuarial documents and non-native sod new breaking acreage insurable at 65 percent of the applicable published county T-Yield in the actuarial documents, standard APH procedure will apply provided the acreage is insurable under the terms of the Basic Provisions. The producer must maintain separate records for the first four crop years of planting on the new breaking acreage. Additionally, new breaking acreage will not be eligible for prevented planting coverage the initial crop year it is insured under this Special Provisions statement.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Quality

GENERAL STATEMENTS:

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

Special Provisions
2024 and Succeeding Crop Years

Year: 2024
Date: 11/15/2023

Commodity: Safflower (0049)
Plan: APH (90)

Unit: MU ~ COA [00] D
County: Harding (063)

Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.

For production qualifying under sections B or C (except for production qualifying under section C3) that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.

The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following:

The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following:

The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following:

- a. Unless the AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under sections A, B and C must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the calendar date for the end of the insurance period.
- b. For production qualifying under sections B or C (except for production qualifying under section C3) that is unsold 60 days after the calendar date for the EOIP, an automatic 30 day extension will be allowed only for the purpose of submitting your claim for indemnity, unless an extension of time to harvest has been granted or a delay in measurement of farm stored production has been elected under the general statements below.
- c. The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following:

1. OPTION TO DELAY CLAIM SETTLEMENT:

- a. On the date of final inspection for the unit, if any of your unsold**** production qualifies for quality adjustment under sections B and/or C1 or C2a ii and C2a iv below, your claim will be settled using the applicable DFs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.
- b. If you elect to delay settlement of your claim for up to 60 days after the calendar date for the EOIP, you must submit a written request to the insurer no later than 60 days after the calendar date for the EOIP. If you do not submit a written request, your claim will be settled using the applicable DFs.
- c. At any time during this delay in settlement, you may request to settle your claim for any unsold production using the applicable DFs.
- d. For any production sold**** to other than a disinterested third party**, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.
- e. If the production is later sold, we will not recalculate or adjust your claim for indemnity.
- f. If the time to harvest has been extended as stated below, this option will not apply beyond 60 days after the calendar date for the EOIP.

1. The DF will be the applicable DFs shown in the chart below added to the applicable DFs included in sections A or B2 above.
- a. Unsold production or production sold to other than a disinterested third party prior to 60 days after the calendar date for the EOIP, the DF will be the applicable DFs shown in the chart below added to the applicable DFs included in sections A or B2 above.
- b. For unsold production or production sold to other than a disinterested third party prior to 60 days after the calendar date for the EOIP, the DF will be the applicable DFs shown in the chart below (unless you elect to delay settlement as specified in the General Statements above) added to the applicable DFs included in sections A or B2 above.
- c. Unsold 60 days after the calendar date for the EOIP, fed, utilized in any other manner, or is sold to other than a disinterested third party, the DF will be the applicable DFs shown in the chart below added to the applicable DFs included in sections A or B3 above.

DFs for Vomitoxin:

Special Provisions 2024 and Succeeding Crop Years

Ùæ^KXU[~ c@Äæ [æÇ Î D

County: Harding (063)

Vomitoxin Range	DF
0.1 - 1.0 ppm	.000
1.1 - 10.0 ppm	.450
10.1 ppm & above	See C3 below

- [illegible]

DFs for Aflatoxin:

Special Provisions

2024 and Succeeding Crop Years

Year: 2024

Commodity: Safflower (0049)

U.S. Warehouse Code: 0049

Date: 11/15/2023

Plan: APH (90)

County: Harding (063)

Aflatoxin Range	DF
0.000 - 0.099 ppb	.000
0.100 - 0.199 ppb	.100
0.200 - 0.299 ppb	.200
0.300 - 0.399 ppb	.300
0.400 - 0.499 ppb	.400
300.1 ppb & above	See C3 below

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any substances or conditions qualifying under section C having a level exceeding the maximum amount allowed or when the edible portion of a crop is exposed to flood waters, a claim will not be completed unless the insured has notified the insurer in writing within 10 days of the date of the loss. If the insured fails to notify the insurer within the 10-day period, the claim will be denied. If the insured notifies the insurer within the 10-day period, the claim will be adjusted for the unit, the following will apply (if such production is Zero Market Value, see section D):
- a. If the insured has notified the insurer within the 10-day period, the claim will be adjusted for the unit, the following will apply (if such production is Zero Market Value, see section D):

 - i. If the insured has notified the insurer within the 10-day period, the claim will be adjusted for the unit, the following will apply (if such production is Zero Market Value, see section D):

disinterested third party; or
 - ii. If the insured has notified the insurer within the 10-day period, the claim will be adjusted for the unit, the following will apply (if such production is Zero Market Value, see section D):

.500 for production that was in on-farm storage and was later sold, was in on-farm storage and was transported to commercial storage and later sold,
 - b. If the insured has notified the insurer within the 10-day period, the claim will be adjusted for the unit, the following will apply (if such production is Zero Market Value, see section D):

 - i. The RIV applied by the buyer due to all insurable quality deficiencies, and that value divided by the local market price for production sold to a disinterested third party; or
 - ii. .500 for production that was in on-farm storage and was later sold, was in on-farm storage and was transported to commercial storage and later sold,
 - c. If the insured has notified the insurer within the 10-day period, the claim will be adjusted for the unit, the following will apply (if such production is Zero Market Value, see section D):

unacceptable to us, such production will not be adjusted for any quality deficiencies listed in section C.
 - d. If production under Section C3 remains unsold, or is not destroyed, more than 365 days after the calendar date for the end of the insurance period, such production will not be adjusted for any quality deficiencies listed in Section C.

U.S. WAREHOUSE CODE ZERO MARKET VALUE PRODUCTION

If the insured has notified the insurer within the 10-day period, the claim will be adjusted for the unit, the following will apply (if such production is Zero Market Value, see section D):

Special Provisions 2024 and Succeeding Crop Years

County: Harding (063)

- | | |
|-------|--|
| | %Local Market Price-As defined in the applicable Basic, Crop, or these Provisions. |
| ** | %Disinterested third party-A person or business who does not routinely purchase production for resale or for feed will not be considered a disinterested third party if the RIVs applied by the buyer are not reflective of the RIVs in the local market. |
| *** | %Zero market value-Occurs when no buyers in your local area are willing to purchase the production and fair consideration to deliver production to a market outside your local marketing area (distant market) is equal to or greater than the production's value at the distant market or when acreage of an insured crop in which the edible portion of the crop has been exposed to flood waters. |
| **** | %Sold-A Grain is considered sold on the date that final settlement between the buyer and seller has occurred and title of the grain has passed from the seller to the buyer. |
| ***** | %Unsold-A Grain that does not meet the definition of %sold. |
