General

CE specific plants may produce plants or plant products as stated in the definition of "specific plant" in the Crop Provisions. For specific plants sold by the count, the quantity for calculations is actual number of such specific plants. For specific plants that are harvested, and the production is sold by weight, the number of pounds is the quantity for calculations. The number of cartons or other containers must be converted to an equivalent number of pounds. [Other measures may be used for calculations as long as it can be converted to number of pounds of production.]

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Type

In accordance with the definition of "plant category" in the Crop Provisions, the following are insurable plant categories and their definitions. The list of genera & } cā ^āĀ ā@Āā@Ājā oĀe\* [ Ĩ Ā^Ĥ^Ā } Ĩ Āe ĀĀ ā^Ĥ Āe•ā } Ājā o Ĥ ĀeĀjā oĀe\* [ Ĩ ĒV@ĀōĤ Ā ĤĀ^ā āā^ĒĒĒ Ā āāe^āĤ Ā [ { ^Ĥ Ā@Ājā } Ā Category Definitions, the specific plants may display attributes of a different Plant Category depending on the location in which it is grown. In this case, use the Plant Category definitions to determine the most appropriate Plant Category.

The CP lists the plant categories insurable under CE. For convenience, these are listed below. The Plant Category definitions in these Special Provisions and in the CE Insurance Standards Handbook help to determine the most appropriate Plant Category.

#### (8) Trees and Shrubs Seedlings and Grafts

Definition: This includes broadleaf evergreens, coniferous and deciduous trees and shrubs. Broadleaf evergreens are perennial woody evergreens that have leaves throughout the year. In temperate zone winters, some broadleaf evergreen may lose their leaves. Coniferous trees and shrubs have needle-like or scale-like leaves that remain on the plant for several seasons. Deciduous trees and shrub are perennial and lose their leaves seasonally. Seedlings are insurable only after growth from seed has initiated. Grafted material is insurable only after graft union has formed.

#### Insurance Availability

In accordance with section 8(i) of the Crop Provisions, industrial hemp (*Cannabis sativa* L.), as defined in the Agricultural Marketing Act of 1946 (7 U.S.C. 1621 et seq.), is the only *Cannabis* species insurable under this policy and only when grown in accordance with the regulations governing industrial hemp production on the land the industrial hemp is produced, when grown and sold with the root system attached and are not stock plants or plants being grown solely for harvest of buds, flowers, or greenery. You must comply with all applicable Federal regulations and any applicable state or tribal laws. Regardless of state or tribal law, the sale of hemp with a THC level greater than 0.3 percent will be considered the sale of a controlled substance. Controlled substances are not insurable. If the industrial hemp is produced in a state or tribal territory which has assumed regulatory responsibility for hemp production, you must comply with all requirements and provisions of the regulatory plan of that state or tribe and possess any license required by that plan. You must provide a copy of the license by the sales closing date. Industrial hemp must be produced using seed or plant cuttings adapted and appropriate for the intended use (for example, if planting industrial hemp to be harvested primarily for fiber, the seed must be adapted to fiber production). Industrial hemp that is unsalable or destroyed due to a delta-9 tetrahydrocannabinol (THC) level that exceeds 0.3 percent will be considered damaged due to uninsurable causes. You must notify us prior to destroying the industrial hemp, in accordance with section 11(a)(1) of the Crop Provisions.
