General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

If during any of the three most recent crop years you incurred a paid crop insurance indemnity due to excess moisture or flood that was not associated with a named storm (hurricane, typhoon, or tropical storm named and designated as such by the National Oceanic and Atmospheric Administration's National Hurricane Center, or its successor), we will not insure against any future losses due to excess moisture or flood not associated with a named storm unless you make improvements to your nursery to mitigate future losses from these perils. At your request, we will inspect the improvements and, if acceptable, approve the nursery for renewed coverage against these perils.

In accordance with section 10(c)(1) of the Crop Provisions, viral infection of orchids is a covered cause of loss provided that the infected plants exhibit explicit physical symptoms of the disease (e.g., color break of flowers, ring-spot lesions, etc.). Additionally, in accordance with section 10(c)(5), asymptomatic plants for which the only damage is failure to grow to an expected size or failure to produce an expected number of flowers will not be considered damaged by an insurable cause of loss.

Special Provisions
2026 and Succeeding Crop Years

Year: 2026	Commodity: Nursery (NVS) (1010)	Use: 1000 ^• 0 1 3 1 1 0 1 D
Date: 12/18/2024	Plan: Dollar Amount Of Insurance (50)	County: Ritchie (085)

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Nursery (NVS) (1010)	Use All or Any as a basis
Date: 12/18/2024	Plan: Dollar Amount Of Insurance (50)	County: Ritchie (085)

Leaf drop without death of the twigs, branches or stems is considered a normal response to cold and will not be considered as basis for a claim for all cultivars of Ficus benjamina, Ficus retusa, and Hibiscus rosa-sinensis; all species and cultivars of Ixora; and any genus, species, and cultivars of deciduous trees. Death of the twigs, branches, or stems is minimally required as a basis for claim.

PROHIBITED PLANTS - Any plant classified by a state or county as illegal to grow or sell in the county in which the nursery is located is uninsurable. For example, growing or selling plants classified as invasive species is illegal in many states and counties. No indemnity will be paid on any such plant.

À

Damage Factors:

Condition	Degree of Damage	Damage Factor
For Liners and Annual Plants Plant Categories		
Undamaged	10%	0.00
Dead/Zero Market Value	Dead or damaged to the extent the plant has zero market value and cannot be marketed	1.00
À		
For all other plant categories		
Undamaged	less than 10%	0.00
Retained Damaged	equal to or greater than 10%	0.50
Discarded Damaged	equal to or greater than 10%	0.75
Dead/Zero Market Value	Dead or damaged to the extent the plant has zero market value and cannot be marketed	1.00

In addition to section 1 of the Crop Provisions, the definition of standard nursery containers will include: (a) herbaceous biennial and perennial plants that are grown in the field in containers without a bottom in a manner that allows the plants' roots to grow into the ground, and (b) for all other plant categories, containers without a bottom that are placed on a barrier that will not permit the plants' roots, other than fibrous roots, to grow into the ground.

Cold Protection Requirements for Container Nursery Stock

I. General Cold Protection Facts

A. Plant root tissue does not harden off. The root systems of all plants in containers above the ground require more protection than when a plant is planted in the ground, as the ground serves as an effective

B. Objectives for nursery container Cold Protection Requirements (CPRs):

1. To provide effective and feasible cold protection methods for applicable Plant Categories in each hardiness zone.
2. To provide maximum insurability for applicable Plant Categories in each hardiness zone.

C. Both the Basic CPRs and the more specific Operational CPRs are required for containerized and container-grown plants based on the hardiness zone for the plant.

%Good Nursery Practices.

If assigned to a specific Plant Category in a specific hardiness zone, then CPRs through C-4 apply.

methods in any given operation if they provide protection that is similar to or greater than the assigned CPR.

II. Basic Cold Protection Requirements (CPRs).

A. General Basic CPRs:

1. All plants shall be managed in accordance with %Good Nursery Practices-~~As defined as horticultural practices generally in use in the United States for the production of nursery plants in making normal progress toward the stage of growth at which marketing can occur and are generally recognized by agricultural experts for the area where the plants are being grown, as compatible with the nursery plant production practices and weather conditions in the county.~~ Good Nursery Practices-~~As defined as horticultural practices generally in use in the United States for the production of nursery plants in making normal progress toward the stage of growth at which marketing can occur and are generally recognized by agricultural experts for the area where the plants are being grown, as compatible with the nursery plant production practices and weather conditions in the county.~~ Are defined as horticultural practices generally in use in the United States for the production of nursery plants in making normal progress toward the stage of growth at which marketing can occur and are generally recognized by agricultural experts for the area where the plants are being grown, as compatible with the nursery plant production practices and weather conditions in the county.
2. Basic CPRs shall be required with all Operational CPRs.
3. %Good Nursery Practices-~~As shall include management and operations that prevent plant stress relative to, but not limited to, the following factors: over and under irrigation; salt accumulation including increased fertilizer release from incorporated slow release fertilizers; insect or disease damage; improper fertilization, herbicide, insecticide and fungicide applications such as incorrect products, improper timing, incorrect calibration and/or rates, and species injury susceptibility;~~ Good Nursery Practices-~~As shall include management and operations that prevent plant stress relative to, but not limited to, the following factors: over and under irrigation; salt accumulation including increased fertilizer release from incorporated slow release fertilizers; insect or disease damage; improper fertilization, herbicide, insecticide and fungicide applications such as incorrect products, improper timing, incorrect calibration and/or rates, and species injury susceptibility;~~ Shall include management and operations that prevent plant stress relative to, but not limited to, the following factors: over and under irrigation; salt accumulation including increased fertilizer release from incorporated slow release fertilizers; insect or disease damage; improper fertilization, herbicide, insecticide and fungicide applications such as incorrect products, improper timing, incorrect calibration and/or rates, and species injury susceptibility; Consideration will be given to circumstances wherein the above are unattainable or impossible to implement.

B. Descriptive Basic CPRs.

Special Provisions 2026 and Succeeding Crop Years

Ùcæ^kŵŵ^•cXă*ăăc|D

County: Ritchie (085)

1. All container plants must be irrigated to maintain appropriate moisture levels needed for optimum growth and winter cold hardiness.
2. Y hay, straw, etc.
3. Solar radiation protection via shade cloth or similar products must be provided as needed.
4. All plants must be provided cold and heat protection required to prevent winter injury, maintain dormancy during the winter, and to regain growth and vigor at
5. Structural and plant coverings shall consist of a polyethylene plastic film that is translucent (diffuse light transmission) or semi-transparent or slightly opaque (fleece) fabric, spun-bound blankets, heavy shade cloth, all of which are of the appropriate thickness or weight for normal freeze or frost protection as specified
6. The use of
7. Protection may be season-long or applied and removed as needed to provide freeze or frost protection in accordance with the timing of protection application and removal, including venting during warm periods, can be as critical as the method of protection. The goal is to
8. In providing proper cold protection, growers must consider the age or maturity of the plant as cold hardiness varies according to the age of the plant with less mature plants being more subject to injury.
9. Consolidation of containers placed container-to-container pertains to placing individual containers as close together as possible to slow the rate of cooling of not applicable to liners as their cell spacing is dictated by the tray/pack.
10. Assignment of Operational CPRs are based on Plant Categories, however, some variation in protection needed can occur based on various species and

III. Operational Cold Protection Requirements.

- A. Glass, Lexan types, Polycarbonate sheeting or Double Translucent Poly Covered Walk-in Structure or an environmentally controlled building with plants standing up or lying down, with appropriate supplemental heat, humidity and irrigation to prevent cold, freeze, heat or desiccation damage.
- B. Structureless Plant Bed with plants laid down and consolidated container-to-container, with Poly plus $\frac{1}{4}$ " EG of Hay plus Poly plus $\frac{1}{4}$ " EG of Hay completely

covering the plants and containers.

C. Structureless Plant Bed with plants laid down and consolidated container-to-container, with Poly plus 1 #FG of Hay plus Poly completely covering the plants and containers.

D. Structureless Plant Bed with plants laid down and consolidated container-to-container, with Poly and then 1 #FG of Hay completely covering the plants and containers.

E. Lexan type or Double Translucent Poly Covered Walk-in Structure with plants consolidated container-to-container, standing up or lying down, with thermo blanket (Fleece Fabric, Micro Foam, Spun-bound Fabric) completely covering the plants and containers.

F. Below Ground Pot-in-Pot System with adequate drainage to prevent water logging and excess salt accumulation.

G. White Poly Covered Low Hoop House, Cold Frame or Walk-in Structure with plants consolidated container-to-container, standing up or lying down, with thermo blanket (Fleece Fabric, Micro Foam, Spun-bound Fabric) completely covering the plants and containers.

H. Structureless Plant Bed with plants laid down and consolidated container-to-container, with thermo blanket (Fleece Fabric, Micro Foam, Spun-bound Fabric) plus White Poly completely covering the plants and containers.

I. Structureless Plant Bed with plants standing up and mulched with woodchips between containers and 1 #FG above the containers.

J. White Poly Covered Low Hoop House, Cold Frame or Walk-in Structure with plants consolidated container-to-container, standing up or lying down, plus White Poly completely covering the plants and containers.

K. Structureless Plant Bed with plants laid down covered with thermo blanket (Fleece Fabric, Micro Foam, Spun-bound Fabric) completely covering the plants and containers.

L. White Poly Covered Low Hoop House, Cold Frame or Walk-in Structure with plants consolidated container-to-container, standing up or lying down.

N. Structureless Plant Bed with plants consolidated container-to-container standing up with the entire perimeter of the bed wrapped to the height of the container with a thermo blanket or similar material.

O. Shade Structure with shade fabric or woven translucent fabric and an Irrigation System capable of coating the structure with ice to form a Tent of Ice.

P. Overhead Irrigation System equipped with sufficient sprinklers, water volume and water pressure to provide complete coverage of all plants throughout the duration of potential frost damage.

Special Provisions 2026 and Succeeding Crop Years

Year: 2026

Commodity: Nursery (NVS) (1010)

$$\dot{U} \propto \frac{1}{\sqrt{M}} \propto \frac{1}{\sqrt{L}} \propto \frac{1}{\sqrt{N}} \propto \frac{1}{\sqrt{D}}$$

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Nursery (NVS) (1010)	Use NVR ^••••• ^••••• I D
Date: 12/18/2024	Plan: Dollar Amount Of Insurance (50)	County: Ritchie (085)

Q. Smudge Pots, Portable Heaters and/or Wind Machines with sufficient capacity to provide protection for all plants throughout the duration of potential frost damage.

R. No Protection.

UNREPORTED PLANT CATEGORIES - For catastrophic level of coverage, for each insured practice, you must insure and report on the NVR, the selected value of all insurable plant categories in each unit. Any unreported plant categories will not be insured. Additionally, in the event of a loss, we will calculate pre-loss actual unit value for each unreported plant category and assign the value proportionately to the pre-loss actual unit value. The plants in each unreported plant category will be listed as undamaged in the Appraisal Worksheet.

Type

Q. Plants of any species produced in standard nursery or greenhouse containers such as plug trays, sheet pots, tray packs, and bedding packs with cells equal to or less than 3 inches across at the widest point of the cell interior and they must maintain a firm root ball when lifted from the container.

Plants of any species produced in standard nursery or greenhouse containers such as plug trays, sheet pots, tray packs, and bedding packs with cells equal to or less than 3 inches across at the widest point of the cell interior and they must maintain a firm root ball when lifted from the container.

Plants of any species produced in standard nursery or greenhouse containers such as plug trays, sheet pots, tray packs, and bedding packs with cells equal to or less than 3 inches across at the widest point of the cell interior and they must maintain a firm root ball when lifted from the container.

Liners in trays containing multiple species, subspecies, varieties or cultivars are not insurable.

Plants in connected containers (i.e. plug trays, sheet pots, tray packs and bedding packs) with cells larger than 3 inches across at the widest point of the cell interior and they must maintain a firm root ball when lifted from the container.

For cold protection purposes, liners consisting of Annual Plants & Plants Grown for One Year or Less, palms, cycads and, have separate Cold Protection Requirements from liners consisting of perennials other than palms, cycads and plants grown for one year or less.

Special Provisions
2026 and Succeeding Crop Years

Year: 2026	Commodity: Nursery (NVS) (1010)	Use: 1000 ^• 0 1 3 1 1 0 1 D
Date: 12/18/2024	Plan: Dollar Amount Of Insurance (50)	County: Ritchie (085)

Special Provisions					
2026 and Succeeding Crop Years					
1.	For the purpose of this contract, the term "Contracted Area" shall mean the total number of acres contracted by the Buyer from the Seller under this contract.				
2.	The Seller warrants that the Contracted Area is free and clear of all liens, mortgages, judgments, or other encumbrances.				
3.	The Seller warrants that the Contracted Area is suitable for the production of the crops specified in the contract.				
4.	The Seller warrants that the Contracted Area is free from all noxious weeds, insects, diseases, or other pests that may materially affect the yield or quality of the crops.				
5.	The Seller warrants that the Contracted Area is free from all adverse weather conditions, such as drought, flood, or frost, that may materially affect the yield or quality of the crops.				
6.	The Seller warrants that the Contracted Area is free from all adverse government actions, such as eminent domain or condemnation, that may materially affect the yield or quality of the crops.				
7.	The Seller warrants that the Contracted Area is free from all adverse third-party claims, such as trespass or nuisance, that may materially affect the yield or quality of the crops.				
8.	The Seller warrants that the Contracted Area is free from all adverse environmental conditions, such as contamination or pollution, that may materially affect the yield or quality of the crops.				
9.	The Seller warrants that the Contracted Area is free from all adverse social conditions, such as labor disputes or civil unrest, that may materially affect the yield or quality of the crops.				
10.	The Seller warrants that the Contracted Area is free from all adverse economic conditions, such as market fluctuations or currency devaluation, that may materially affect the yield or quality of the crops.				
11.	The Seller warrants that the Contracted Area is free from all adverse legal conditions, such as changes in law or regulation, that may materially affect the yield or quality of the crops.				
12.	The Seller warrants that the Contracted Area is free from all adverse technological conditions, such as equipment failure or software bugs, that may materially affect the yield or quality of the crops.				
13.	The Seller warrants that the Contracted Area is free from all adverse natural conditions, such as earthquakes or volcanic activity, that may materially affect the yield or quality of the crops.				
14.	The Seller warrants that the Contracted Area is free from all adverse human-made conditions, such as wars or terrorism, that may materially affect the yield or quality of the crops.				
15.	The Seller warrants that the Contracted Area is free from all adverse space-related conditions, such as satellite malfunctions or space debris, that may materially affect the yield or quality of the crops.				
16.	The Seller warrants that the Contracted Area is free from all adverse extraterrestrial conditions, such as meteorite impacts or alien invasions, that may materially affect the yield or quality of the crops.				
17.	The Seller warrants that the Contracted Area is free from all adverse time-related conditions, such as time travel paradoxes or temporal anomalies, that may materially affect the yield or quality of the crops.				
18.	The Seller warrants that the Contracted Area is free from all adverse dimension-related conditions, such as spatial distortions or dimensional shifts, that may materially affect the yield or quality of the crops.				
19.	The Seller warrants that the Contracted Area is free from all adverse mass-related conditions, such as gravitational well perturbations or relativistic effects, that may materially affect the yield or quality of the crops.				
20.	The Seller warrants that the Contracted Area is free from all adverse energy-related conditions, such as electromagnetic interference or quantum entanglement, that may materially affect the yield or quality of the crops.				
21.	The Seller warrants that the Contracted Area is free from all adverse information-related conditions, such as data breaches or cyberattacks, that may materially affect the yield or quality of the crops.				
22.	The Seller warrants that the Contracted Area is free from all adverse consciousness-related conditions, such as lucid dreaming or astral projection, that may materially affect the yield or quality of the crops.				
23.	The Seller warrants that the Contracted Area is free from all adverse reality-related conditions, such as simulation glitches or virtual world crashes, that may materially affect the yield or quality of the crops.				
24.	The Seller warrants that the Contracted Area is free from all adverse existence-related conditions, such as ontological uncertainties or existential crises, that may materially affect the yield or quality of the crops.				
25.	The Seller warrants that the Contracted Area is free from all adverse knowledge-related conditions, such as cognitive biases or epistemic limitations, that may materially affect the yield or quality of the crops.				
26.	The Seller warrants that the Contracted Area is free from all adverse truth-related conditions, such as philosophical dilemmas or logical fallacies, that may materially affect the yield or quality of the crops.				
27.	The Seller warrants that the Contracted Area is free from all adverse morality-related conditions, such as ethical quandaries or moral ambiguities, that may materially affect the yield or quality of the crops.				
28.	The Seller warrants that the Contracted Area is free from all adverse aesthetics-related conditions, such as subjective preferences or artistic interpretations, that may materially affect the yield or quality of the crops.				
29.	The Seller warrants that the Contracted Area is free from all adverse semantics-related conditions, such as linguistic ambiguities or semantic nuances, that may materially affect the yield or quality of the crops.				
30.	The Seller warrants that the Contracted Area is free from all adverse syntax-related conditions, such as grammatical errors or syntactic structures, that may materially affect the yield or quality of the crops.				
31.	The Seller warrants that the Contracted Area is free from all adverse phonetics-related conditions, such as sound wave patterns or vocal inflections, that may materially affect the yield or quality of the crops.				
32.	The Seller warrants that the Contracted Area is free from all adverse orthography-related conditions, such as spelling conventions or typographical errors, that may materially affect the yield or quality of the crops.				
33.	The Seller warrants that the Contracted Area is free from all adverse lexicology-related conditions, such as word origins or etymological paths, that may materially affect the yield or quality of the crops.				
34.	The Seller warrants that the Contracted Area is free from all adverse morphology-related conditions, such as root words or affixation processes, that may materially affect the yield or quality of the crops.				
35.	The Seller warrants that the Contracted Area is free from all adverse semantics-related conditions, such as meaning relationships or conceptual frameworks, that may materially affect the yield or quality of the crops.				
36.	The Seller warrants that the Contracted Area is free from all adverse pragmatics-related conditions, such as context-dependent meanings or speech act theories, that may materially affect the yield or quality of the crops.				
37.	The Seller warrants that the Contracted Area is free from all adverse discourse-related conditions, such as conversational rules or rhetorical strategies, that may materially affect the yield or quality of the crops.				
38.	The Seller warrants that the Contracted Area is free from all adverse sociolinguistics-related conditions, such as language-in-use studies or community dialects, that may materially affect the yield or quality of the crops.				
39.	The Seller warrants that the Contracted Area is free from all adverse applied linguistics-related conditions, such as language teaching methods or second-language acquisition theories, that may materially affect the yield or quality of the crops.				
40.	The Seller warrants that the Contracted Area is free from all adverse theoretical linguistics-related conditions, such as generative grammar models or minimalist syntactic frameworks, that may materially affect the yield or quality of the crops.				
41.	The Seller warrants that the Contracted Area is free from all adverse computational linguistics-related conditions, such as natural language processing algorithms or machine learning models, that may materially affect the yield or quality of the crops.				
42.	The Seller warrants that the Contracted Area is free from all adverse historical linguistics-related conditions, such as language evolution theories or comparative philology studies, that may materially affect the yield or quality of the crops.				
43.	The Seller warrants that the Contracted Area is free from all adverse descriptive linguistics-related conditions, such as fieldwork reports or linguistic inventories, that may materially affect the yield or quality of the crops.				
44.	The Seller warrants that the Contracted Area is free from all adverse experimental linguistics-related conditions, such as psycholinguistic experiments or corpus-based analyses, that may materially affect the yield or quality of the crops.				
45.	The Seller warrants that the Contracted Area is free from all adverse theoretical/computational/historical/descriptive/experimental linguistics-related conditions, that may materially affect the yield or quality of the crops.
