You may use a contract price to determine your insurance guarantee when a contract price code of ~~yes~~ exists on the Prices tab in the actuarial documents for the crop, type, and practice.

Contract price authority (i.e., rules governing the use of contract prices and the method to determine a contract price) will be found in one of the following three places, listed in priority order:

1. Special Provisions, separate from this statement, which authorizes the use of the Contract Price Addendum (CPA);
2. Crop Provisions; or
3. CPA.

When the contract price code is ~~yes~~ on the Prices tab for the crop, type, and practice:

1. If the Crop Provisions or Special Provisions provide the contract price authority, your price will be determined in accordance with the Crop Provisions or Special Provisions. If neither the Crop Provisions or Special Provisions provide contract price authority, your price will be determined in accordance with the CPA; and
2. The Crop Provisions or Special Provisions may only provide contract price authority for specific types or practices. When this occurs, the CPA may be used to determine a contract price for other types or practices where contract price authority is not provided through the Crop Provisions or these Special Provisions.

Insurance Availability

*6 In addition to section 6(a) of the Safflower Crop Provisions, non-irrigated safflower planted on the land on which a fallow practice has not occurred once in the most recent three-year period is uninsurable. Fallow is defined as a production practice utilized to allow soil moisture levels to increase by leaving acreage fallow for a full crop year. Any plant growth (e.g., weeds, volunteer crop, etc.) must be terminated on or before SEPTEMBER 30 and any later plant growth must be controlled by mechanical or chemical means. However, if a crop was planted on acreage qualifying as fallow the preceding crop year but was terminated on or before MAY 15, and any later growth is controlled by mechanical or chemical means, the acreage will qualify as fallow the next crop year. For example: if acreage is planted to wheat in the fall of 2013 (2014 crop year) which qualifies as fallow and the wheat is terminated on or before MAY 15, 2014, and any later growth is controlled by mechanical or chemical means, the acreage planted to wheat in the fall of 2014 (2015 crop year) will qualify as fallow.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.
