Relay cropping is defined as a cropping practice where a second-planted crop ("relay crop") is planted into an established crop (other than a cover crop) where the crops are planted in a manner that allows separate agronomic maintenance and harvest of the crops unless otherwise defined in the Crop Provisions. Damage to either crop during planting, harvest, or general maintenance of either crop will be considered an uninsurable cause of loss.

Date

- *3 In accordance with section 10 of the Crop Provisions, the end of insurance date will be no later than the date specified in the actuarial documents.

Price

See the prices tab for allowable costs, minimum value, minimum value option I and minimum value option II prices.

The allowable cost for harvested sold production (excluding u-pick, penhooking and direct marketing) will include the actual cost of picking, grading, packing containers, hauling and selling, not to exceed the amount specified in the actuarial documents.

Refer to the Prevented Planting and Replanting Payment tab for replanting payment amounts.

Insurance Availability

- *7 Peppers that are relay cropped into an existing bed where a fruit or vegetable crop is grown will not be insurable except as allowed by written agreement. To qualify for a written agreement, you must submit a request in accordance with Section 18 of the Basic Provisions and provide your production and sales records for the most recent crop year you grew peppers under this practice in the county.
