Price

In accordance with section 11(e)(1) of the Raisin Crop Provisions, the maximum allowance for a reconditioning payment for raisins will be the lesser of the actual cost of reconditioning, or \$250 per ton multiplied by the insured's elected coverage level.

For the purposes of computing an indemnity, the insurance price for all coverage levels will be the reference maximum dollar amount.

For CAT coverage only, the amount of any indemnity will be determined by:

- (1) multiplying the insured tonnage of raisins by 50% of the reference maximum dollar amount;
- (2) subtracting therefrom the adjusted value to count of the insured tons of raisins;
- (3) multiplying this result by 0.55; and,
- (4) multiplying this result by your share.

In addition to section 8 (b)(1) of the Raisin Crop Provisions, insurance will not attach to any mechanically harvested raisins laid down on a continuous tray after September 25 in vineyards with east-west rows.
