General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Premium

In accordance with section 6 of the Small Grains Crop Provisions, a reduced premium rate is provided for acreage intentionally destroyed before harvest by grazing or other means. To qualify for the reduced premium rate you must notify your agent no later than March 1.

Special Provisions 2026 and Succeeding Crop Years

| | | |
|-----------------|--|-----------------------|
| Year: 2026 | Commodity: Wheat (0011) | Upland Soybean (0001) |
| Date: 6/17/2025 | Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03) | County: Murray (099) |

Insurance Availability

Any fall planted acreage on which seed is spread onto the soil surface by any method (e.g. airplane or otherwise broadcast seeded) and is subsequently mechanically incorporated into the soil, will be insurable only if you request an inspection for this acreage within 72 hours after the final planting date or within 72 hours after you complete incorporating the seed if you plant in the late planting period, and we agree in writing that the acreage has an adequate stand to produce the yield used to determine your production guarantee. No coverage will be provided if an adequate stand is not established within 30 days after the end of the late planting period or within 30 days after the final planting date if no late planting period is applicable. Insurance will attach to acreage with an adequate stand on the date the acreage is inspected.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

In lieu of the provisions in section 22(a) of the Basic Provisions that says "[h]owever, unless specifically required by policy provisions, you must not obtain any other crop insurance authorized under the Act on your share of the insured crop," you may obtain a Small Grains Crop Insurance policy and an Annual Forage policy on the same acreage that is planted with the intent of grazing the crop first and then later harvesting the crop for grain.

Quality

GENERAL STATEMENTS:

For the purpose of this section, the term "quality" means the quality of the crop as determined by the quality adjustment factors.

For the purpose of this section, the term "quality adjustment factors" means the factors that are used to adjust the production to count for quality. The quality adjustment factors are considered in determining production to count.

For the purpose of this section, the term "net production to count" means the production to count after the quality adjustment factors are applied. The net production to count is determined by subtracting the quality adjustment factors from the production to count.

Qualifying for quality adjustment, that does not contain substances or conditions that are injurious to human or animal health, shall be adjusted under the quality adjustment factors.

The AIP grants an extension of time to harvest as specified below, the samples of production used to determine insurable quality deficiencies under Sections A,

If you elect to delay measurement of farm stored production as provided in the Basic Provisions, all samples of farm stored production used to determine insurable quality deficiencies must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the EOIP, otherwise such production will not be eligible for payment.

5. FAIR CONSIDERATION TO DELIVER TO DISTANT MARKETS

Sold to other than a disinterested third party, fed, utilized in any other manner, or when a pre-established DF is applicable.

6. ZERO MARKET VALUE

Special Provisions 2026 and Succeeding Crop Years

| | | |
|-----------------|--|----------------------|
| Year: 2026 | Commodity: Wheat (0011) | Unit: MT |
| Date: 6/17/2025 | Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03) | County: Murray (099) |

On the date of final inspection for the unit, any production which due to insurable causes is determined to have zero market value***, such production will not be included in the calculation of the RIV, except for production fed or used in any other manner.

7. REDUCTION IN VALUE (RIV):

RIV is calculated as follows:

- a. Moisture content;
- b. Damage due to uninsured causes;
- c. Drying;
- d. Handling;
- e. Processing; or
- f. Any other costs associated with normal harvesting, handling, and marketing of your production.
 - i. RIVs cannot be used in combination with chart DFs.
 - ii. RIVs can be used to reduce the RIV for production to the distant market, provided the resulting RIV does not exceed the RIV in your local marketing area.
 - iii. RIVs can be used to reduce the RIV for production to the distant market, provided the resulting RIV does not exceed the RIV before conditioning.
 - iv. RIVs can be used to reduce the RIV for production to the distant market, provided the resulting RIV does not exceed the RIV before conditioning.

SECTION A - DISCOUNT FACTOR CHARTS

U) RIV is calculated as follows:

RIV is calculated as follows:

GRADE DISCOUNT:

RIV is calculated as follows:

Special Provisions 2026 and Succeeding Crop Years

field, was fed or utilized in any other manner, was in on-farm storage and has been sold, or was sold to other than a disinterested third party:

- i. Applicable DFs included in sections A or B2 above.
- ii. Applicable DFs included in sections A or B2 above.
- iii. Applicable DFs included in sections A or B3 above.

DFs for Aflatoxin:

| Aflatoxin Range | DF |
|-------------------|---|
| 0.1 - 300.1 ppb | See Quality Adjustment Tab for Discount Factors |
| 300.1 ppb & above | See C3 below |

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any other substances or conditions qualifying under Section C having a level exceeding the maximum amount allowed or when the edible portion of a crop is exposed to flood waters, a claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed
 - a. If the level of Aflatoxin is less than 300 ppb, the level of Vomitoxin is less than 10 ppm, and the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
 - b. If the level of Aflatoxin is 300 ppb or more, the level of Vomitoxin is 10 ppm or more, and the production is sold, fed, utilized in any other manner, or destroyed, the claim will be:
 - i. Voted by the board of directors of the company to be sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
 - ii. If the level of Aflatoxin is 300 ppb or more, the level of Vomitoxin is 10 ppm or more, and the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.
 - c. If the level of Aflatoxin is 300 ppb or more, the level of Vomitoxin is 10 ppm or more, and the production is sold, fed, utilized in any other manner, or destroyed, the claim will be adjusted for any quality deficiencies listed in Section C.

An automatic 30 day extension of time will be allowed for you to submit your claim for indemnity.

| | |
|-------|--|
| * | %Local Market Price-As defined in the applicable Basic, Crop, or these Provisions. |
| ** | %Disinterested third party-As defined in the applicable Basic, Crop, or these Provisions. %Disinterested third party-Is a person or business who does not routinely purchase production for resale or for feed will not be considered a disinterested third party if the RIVs applied by the buyer are not reflective of the RIVs in the local market. |
| *** | %Zero market value-Occurs when no buyers in your local area are willing to purchase the production and fair consideration to deliver production to a market outside your local marketing area (distant market) is equal to or greater than the production's value at the distant market or when acreage of an insured crop in which the edible portion of the crop has been exposed to flood waters. |
| **** | %Sold-Grain is considered sold on the date that final settlement between the buyer and seller has occurred and title of the grain has passed from the seller to the buyer. |
| ***** | %Unsold-Grain that does not meet the definition of %sold. |
