Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

### Practice

\*4 The current crop year:

1. The acreage must not have been planted to a crop (excluding a cover crop, see exceptions below) during the preceding crop year; and
2. Any plant growth, including weeds, volunteer crops, existing perennial vegetation (including acreage emerging from USDA programs (such as CRP) and/or
3. Any additional plant re-growth must be terminated on or before June 1, and any later plant growth (e.g. weeds, volunteer crop) must be controlled by mechanical or chemical means.

(b) The following are exceptions to these requirements:

1. Failed Crop Exception: Acreage will qualify as summerfallow the current crop year, if a crop (excluding a cover crop) was planted the preceding crop year:
  - i. On acreage qualifying as summerfallow; and
  - ii. Was not harvested; and
  - iii. Failed and was terminated on or before June 1, and any later plant growth was controlled by mechanical or chemical means.
2. Cover Crop Exception: Acreage will qualify for the summerfallow practice in the current crop year if a cover crop was planted during the preceding crop year, provided the cover crop was:
  - i. Not hayed, grazed, cut for silage, haylage, or baleage or harvested for grain seed; and
  - ii. Terminated according to the NRCS Cover Crop Termination Guidelines and any later plant growth was controlled by mechanical or chemical means.

### Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

## Special Provisions 2026 and Succeeding Crop Years

| Date: 6/17/2025 | Plan: Yield Protection (01)<br>Revenue Protection (02)<br>Revenue Prot with Harvest Price Exclusion (03) | County: Benewah (009) |

Insurance will not attach to any acreage on which canola, camelina, mustard, or rapeseed, were planted the preceding crop year. A crop which was planted and then all plant growth was terminated by chemical or mechanical means prior to: April 15 for the fall planted types; or June 1 for the spring planted types, will not be considered planted for rotational purposes only. The insured is responsible to provide proof of insurability.

Cultivars of Brassica Juncea meeting US Standards for Grain as canola, e.g. Juncea Canola are eligible for insurance under the Canola and Rapeseed Crop Provisions and are not insurable under the Mustard Crop Provisions.

Cultivars of Brassica carinata are eligible for insurance under the Canola and Rapeseed Crop Provisions and are not insurable under the Mustard Crop Provisions; however, Brassica carinata is only insurable by written agreement.

\*9 Insurance shall not attach or be considered to have attached without a written agreement to a planted non-irrigated crop on acreage from which, in the same calendar year:

- 1) A perennial hay crop was harvested; or
- 2) A crop (other than a cover crop) reached the headed or budded stage prior to termination, regardless of the percentage of plants that reached the headed or budded stage;

Termination means growth has ended. To qualify for a written agreement, you must provide a minimum of the most recent three years of your double cropping actual production history for the crop in the county. A cover crop is one that meets the criteria outlined in the Insurance Availability section of these Special Provisions.
