General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

In accordance with the definition of "production reporting date" in the Basic Provisions, if you submit an application for insurance after the winter sales closing date or land is added after the production reporting date on which the spring type will be planted, the production reporting date will be the earlier of the acreage reporting date or 45 days after the spring sales closing date.

Type

- *5 Approved malting barley varieties will include all varieties recommended for malting by the American Malting Barley Association for the current crop year.
- *6 Malting Barley Endorsement is not available in this county.
- *7 Production Contract - A document in writing
 - a. Between you and a buyer that is a brewery or any other buyer that produces or sells malt or malt products to a brewery, or a business enterprise owned by

Special Provisions 2026 and Succeeding Crop Years

Ùæ^kMÔæã[!}ã€D

County: Siskiyou (093)

- b. That specifies the amount of contracted production, the purchase price or a method to determine such price; and
- c. That establishes the obligations of each party to the agreement

*8 You may elect to use the price contained in your production contract (contract price) as your projected price for each specialty type. This acreage must be under contract with a business enterprise equipped with facilities appropriate to handle and store specialty type barley production. The contract must be executed by you and the business enterprise, in effect for the crop year, and you must provide a copy to us no later than the acreage reporting date. To be considered a contract, the executed document must contain:

- 4

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Barley (0091)	Use: Winter !} and D
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Siskiyou (093)

is subject to the limits referred to in (c)(3).

- d. Other such terms that establish the obligations of each party to the contract; and
- e. The contract must clearly indicate the specific specialty type or verification must be provided that the contracted variety is one of the specialty types listed above.

Any acreage of the specialty type that is not under a contract per (b)(3) above, or for which a contract is not submitted to us by the acreage reporting date, will be valued at the applicable barley projected price. A weighted average price will be determined from all the contracted and non-contracted acreage of the specialty type, to produce one projected price that will be used in determining the guarantee (per acre), premium, prevented planting payment, replanting payment, and indemnity for the applicable specialty type acreage.

Note: Quality adjustment will be provided as specified in the crop provisions and special provisions. No additional quality adjustment will be made for malting barley.

Date

- *9 If you have selected the winter coverage endorsement (WCE) for the winter types, the following dates applicable to your policy are specified in the Options section within the Dates tab of the Actuarial Information Browser:
- 1) The sales closing date [applicable for both winter and spring types];
 - 2) The final planting date for acreage covered under the WCE and the WCE will not be applicable to acreage planted after this date; and
 - 3) The acreage reporting date for acreage of the winter types covered by this option.

Insurance Availability

Barley or oats planted with or as a mixture of small grains. Such mixture of small grains will be insurable corresponding to the predominate grain in the mixture (barley or oats).

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

You may elect to exclude coverage for the specialty type(s) under revenue protection provided you purchase, from the same approved insurance provider, yield protection for the excluded type(s). The yield protection plan of insurance you purchase may have a different coverage level or percentage of projected price than you have for the revenue protection plan of insurance. You may exclude any or all of the specialty type(s) you produce; however, you must continue to insure all type(s) not excluded under revenue protection.
