## Special Provisions

### 2026 and Succeeding Crop Years

Year: 2026	Commodity: Soybeans (0081)	Use All or None A/D
Date: 6/9/2025	Plan: Margin Protection (16) Margin Protection with Harvest Price Option (17)	County: Colorado (089)

#### Insurance Availability

In lieu of section 2(h) of the Margin Protection plan provisions, insureds with MP may not elect SCO on the Base policy. If SCO is elected, the SCO election will be void.

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

Insurance shall not attach or be considered to have attached without a written agreement to a planted non-irrigated crop on acreage from which, in the same calendar year:

1. A perennial hay crop was harvested; or
2. A crop (other than a cover crop), that is hayed, grazed or harvested past March 1. The crop must be terminated in accordance with NRCS Cover Crop Termination Guidelines.

Termination means growth has ended. A cover crop is one that meets the criteria outlined in the Insurance Availability section of the Special Provisions.

To qualify for a written agreement, you must submit a request for a written agreement in accordance with Section 18 of the Basic Provisions and provide a minimum of the most recent two years of your double cropping actual production history (APH) for the crop in the county.
