General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Sections 17(f)(8)(i)(E), 17(f)(8)(ii), and 17(f)(8)(iii) of the Basic Provisions do not apply for the 2026 crop year. New breaking acreage will not be eligible for prevented planting coverage the initial year.

Date

- *4 If you have selected the winter coverage endorsement (WCE) for the winter types, the following dates applicable to your policy are specified in the Options section within the Dates tab of the Actuarial Information Browser:
- 1) The sales closing date [applicable for both winter and spring types];
 - 2) The final planting date for acreage covered under the WCE and the WCE will not be applicable to acreage planted after this date; and
 - 3) The acreage reporting date for acreage of the winter types covered by this option.

Price

- *5 The Base (contracted) Price will not include added value attributable to hauling expenses beyond the local marketing area or post production operations such as processing (cleaning/drying), sorting, packaging, etc.

Special Provisions 2026 and Succeeding Crop Years

| | | |
|-----------------|--|-------------------|
| Year: 2026 | Commodity: Barley (0091) | Use: Winter AFI D |
| Date: 6/17/2025 | Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03) | County: Gem (045) |

Insurance Availability

Barley or oats planted with or as a mixture of small grains. Such mixture of small grains will be insurable corresponding to the predominate grain in the mixture (barley or oats).

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

- *9 Approved malting barley varieties will include all varieties recommended for malting by the American Malting Barley Association for the current crop year, or any variety grown under the terms of a malting barley contract. See the definition of "contract" in the applicable Malting Barley Endorsement.
- *10 Insurance shall not attach or be considered to have attached without a written agreement to a planted non-irrigated crop on acreage from which, in the same calendar year:
 - 1) A perennial hay crop was harvested; or
 - 2) A crop (other than a cover crop) reached the headed or budded stage prior to termination, regardless of the percentage of plants that reached the headed or budded stage;

Termination means growth has ended. To qualify for a written agreement, you must provide a minimum of the most recent three years of your double cropping actual production history for the crop in the county. A cover crop is one that meets the criteria outlined in the Insurance Availability section of these Special Provisions.
- *11 In lieu of section 7(a)(2)(iii) of the Small Grains Crop Provisions, any acreage of fall planted barley not covered by the winter coverage endorsement is not insured unless you request such coverage by notifying your crop insurance agent on or before the spring sales closing date and we determine in writing that the acreage has an adequate stand in the spring to produce the yield used to determine your production guarantee. Insurance will attach to such acreage on the date we determine an adequate stand exists or on the spring final planting date if we do not inspect the acreage by the spring final planting date.
- *12 Approved winter barley varieties for the winter coverage endorsement include only the following: Alba, Boyer, Charles, Eight-Twelve, Endeavor, Hesk, Hoody, Hundred, Kamiak, Kold, Maja, Mal, Scio, Schuyler, Sprinter, Strider, Sunstar Pride, Thunder, Wintmalt and other cultivars approved in writing by FCIC.

Special Provisions

2026 and Succeeding Crop Years

| | | |
|-----------------|--|--------------------|
| Year: 2026 | Commodity: Barley (0091) | Use: Malting AFI D |
| Date: 6/17/2025 | Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03) | County: Gem (045) |

Revenue Protection

There are three ways to insure malting barley: (1) Under yield protection or revenue protection, based on a price calculated in accordance with the Commodity Exchange Price Provisions, as applicable; (2) Under yield protection or revenue protection with added protection provided in accordance with the Malting Barley Endorsement (MBE); or (3) under yield protection, based on a price contained in a production contract as indicated below.

If you produce any of the following specialty barley type(s) (including specialty type(s) grown for seed):

- a) Malting - varieties recommended for malting by the American Malting Barley Association for the current crop year, or any variety grown under the terms of a malting barley contract. Winter and Spring will be separate specialty types if separate type codes exist in the county.
- b) Waxy Hulled - having a waxy appearance and an adhering palea and lemma.
- c) Waxy Hulless - having a waxy appearance and a non-adhering palea and lemma.
- d) Hulless - having a non-adhering palea and lemma, not including waxy hulless barley.

You may elect to exclude coverage for the specialty type(s) under revenue protection (excluding malting barley insured under the MBE) provided you purchase, from the same approved insurance provider, yield protection for the excluded type(s). The yield protection plan of insurance you purchase may have a different coverage level or percentage of projected price than you have for the revenue protection plan of insurance. You may exclude any or all of the specialty type(s) you produce; however, you must continue to insure all type(s) not excluded under revenue protection.

Revenue Protection with HPE

There are three ways to insure malting barley: (1) Under yield protection or revenue protection, based on a price calculated in accordance with the Commodity Exchange Price Provisions, as applicable; (2) Under yield protection or revenue protection with added protection provided in accordance with the Malting Barley Endorsement (MBE); or (3) under yield protection, based on a price contained in a production contract as indicated below.

If you produce any of the following specialty barley type(s) (including specialty type(s) grown for seed):

- a) Malting - varieties recommended for malting by the American Malting Barley Association for the current crop year, or any variety grown under the terms of a malting barley contract. Winter and Spring will be separate specialty types if separate type codes exist in the county.
- b) Waxy Hulled - having a waxy appearance and an adhering palea and lemma.
- c) Waxy Hulless - having a waxy appearance and a non-adhering palea and lemma.
- d) Hulless - having a non-adhering palea and lemma, not including waxy hulless barley.

Special Provisions 2026 and Succeeding Crop Years

| | | |
|-----------------|--|---------------------|
| Year: 2026 | Commodity: Barley (0091) | Use: 00000000 AFI D |
| Date: 6/17/2025 | Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03) | County: Gem (045) |

You may elect to exclude coverage for the specialty type(s) under revenue protection (excluding malting barley insured under the MBE) provided you purchase, from the same approved insurance provider, yield protection for the excluded type(s). The yield protection plan of insurance you purchase may have a different coverage level or percentage of projected price than you have for the revenue protection plan of insurance. You may exclude any or all of the specialty type(s) you produce; however, you must continue to insure all type(s) not excluded under revenue protection.

Yield Protection

If you produce any of the following specialty barley type(s) (including specialty type(s) grown for seed):

- a) Malting - varieties recommended for malting by the American Malting Barley Association for the current crop year, or any variety grown under the terms of a malting barley contract. Winter and Spring will be separate specialty types if separate type codes exist in the county.
- b) Waxy Hulled - having a waxy appearance and an adhering palea and lemma.
- c) Waxy Hulless - having a waxy appearance and a non-adhering palea and lemma.
- d) Hulless - having a non-adhering palea and lemma, not including waxy hulless barley.

appropriate to handle and store specialty type barley production. The contract must be executed by you and the business enterprise, in effect for the crop year, and you must provide a copy to us no later than the acreage reporting date. To be considered a contract, the executed document must contain:

- (a) A requirement that you plant, grow and deliver specialty type barley to the business enterprise;
- (b) The amount of production that will be accepted or a statement that all production from a specified number of acres will be accepted. To determine the number of acres under contract:
 - (1) For acreage only based contracts and, acreage and production contracts which specify a maximum number of acres, the lesser of:
 - (i) The insured acres (planted acreage and acreage that is prevented from being planted); or
 - (ii) The maximum number of acres specified in the contract.
 - (2) For production only based contracts, the lesser of:
 - (i) The number of acres determined by dividing the production stated in the contract by the approved yield; or

Special Provisions

2026 and Succeeding Crop Years

| | | |
|-----------------|--|-------------------|
| Year: 2026 | Commodity: Barley (0091) | Use All or AFI D |
| Date: 6/17/2025 | Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03) | County: Gem (045) |

(ii) The insured acres (planted acreage and acreage that is prevented from being planted).

(3) Acreage in excess of (1) or (2) shall be considered acreage not under contract.

(c) The price to be paid for the contracted production or a method to determine such price:

(1) If the contract provides for a premium amount over a

(i) Feed barley price to be determined after the acreage reporting date, the contract price will be the result of adding the premium amount to the published projected price on the acreage reporting date; or

(ii) Price other than a feed barley price that is determined after the acreage reporting date, the contract price will be the result of adding the basis or premium amount to the Malt Barley Endorsement published projected price on the acreage reporting date.

(2) The price used will be the price in the contract without regard to incentives or discounts.

(3) In no case will the contract price exceed the amount determined by multiplying the projected price by the maximum contract price factor shown in the Prices tab in these Actuarial Documents.

(4) If you have more than one contract price for any one specialty type, the price used will be the weighted average of the contract prices. Each contract price is subject to the limits referred to in (c)(3).

(d) Other such terms that establish the obligations of each party to the contract; and

(e) The contract must clearly indicate the specific specialty type or verification must be provided that the contracted variety is one of the specialty types listed above.

Any acreage of the specialty type that is not under a contract per (b)(3) above, or for which a contract is not submitted to us by the acreage reporting date, will be valued at the applicable barley projected price. A weighted average price will be determined from all the contracted and non-contracted acreage of the specialty type, to produce one projected price that will be used in determining the guarantee (per acre), premium, prevented planting payment, replanting payment, and indemnity for the applicable specialty type acreage.

Section 9 ~~Replanting Payments~~ of the Small Grains Crop Provisions apply to all insurable barley types.

Note: Quality adjustment will be provided as specified in the crop provisions and special provisions. No additional quality adjustment will be made for any specialty type, except for malting barley insured under the Malting Barley Endorsement.

Special Provisions 2026 and Succeeding Crop Years

| | | |
|-----------------|--|----------------------|
| Year: 2026 | Commodity: Barley (0091) | Use All Others QAF D |
| Date: 6/17/2025 | Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03) | County: Gem (045) |

Quality

- *16 Your specialty type barley will be quality adjusted in the same manner as All Others type barley. We will use the discount factor charts in the Special Provisions, or if applicable, the reduction in value (RIV) and local market price for All Others barley, without regard to any contract price for your specialty type barley. The RIV will be based on the reduction in value applied by buyers to the All Others type with similar quality deficiencies.

GENERAL STATEMENTS:

For the purpose of this statement, the following definitions apply:

Net Production to Count: The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.

Quality Adjustment Factor (QAF): The QAF is determined by the difference between the actual quality and the minimum quality required for the crop. The QAF is calculated as follows:

Quality Adjustment Factor (QAF) Calculation: The QAF is determined by the difference between the actual quality and the minimum quality required for the crop. The QAF is calculated as follows:

Quality Adjustment Factor (QAF) Calculation: The QAF is determined by the difference between the actual quality and the minimum quality required for the crop. The QAF is calculated as follows:

Quality Adjustment Factor (QAF) Calculation: The QAF is determined by the difference between the actual quality and the minimum quality required for the crop. The QAF is calculated as follows:

The DF for production qualifying for quality adjustment containing substances or conditions that are injurious to human or animal health will be determined in accordance with the following provisions:

a. For the purpose of this statement, the following definitions apply:

b. Sections C1 or C2 and Section B below, the DF will be determined by adding the applicable DFs from Section B to the applicable DFs from Sections C1 or C2.

1. $\frac{Q_1(A) \cdot [a \cdot R(a)]}{A} \cdot \frac{Q_2(A)}{A} \cdot \frac{Q_3(A)}{A} \cdot \frac{Q_4(A)}{A} \cdot \frac{Q_5(A)}{A} \cdot \frac{Q_6(A)}{A} \cdot \frac{Q_7(A)}{A} \cdot \frac{Q_8(A)}{A} \cdot \frac{Q_9(A)}{A} \cdot \frac{Q_{10}(A)}{A}$
- a. $\frac{Q_1(A) \cdot [a \cdot R(a)]}{A} \cdot \frac{Q_2(A)}{A} \cdot \frac{Q_3(A)}{A} \cdot \frac{Q_4(A)}{A} \cdot \frac{Q_5(A)}{A} \cdot \frac{Q_6(A)}{A} \cdot \frac{Q_7(A)}{A} \cdot \frac{Q_8(A)}{A} \cdot \frac{Q_9(A)}{A} \cdot \frac{Q_{10}(A)}{A}$
- b. For unsold production or production sold to other than a disinterested third party prior to 60 days after the calendar date for the EOIP, the DF will be the applicable DFs shown in the chart below (unless you elect to delay settlement as specified in the General Statements above) added to the applicable DFs included in sections A or B2 above.
- c. Unsold 60 days after the calendar date for the EOIP, fed, utilized in any other manner, or is sold to other than a disinterested third party, the DF will be the applicable DFs shown in the chart below added to the applicable DFs included in sections A or B3 above.

DFs for Vomitoxin:

Special Provisions 2026 and Succeeding Crop Years

| | | |
|-----------------|--|---------------------------|
| Year: 2026 | Commodity: Barley (0091) | Use: 00000000000000000000 |
| Date: 6/17/2025 | Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03) | County: Gem (045) |

| | |
|-------------------|---|
| Aflatoxin Range | DF |
| 0.0 - 300.1 ppb | See Quality Adjustment Tab for Discount Factors |
| 300.1 ppb & above | See C3 below |

Ä

3. For production that has an Aflatoxin level in excess of 300 ppb, a Vomitoxin level in excess of 10 ppm, or any other substances or conditions qualifying under Section C having a level exceeding the maximum amount allowed or when the edible portion of a crop is exposed to flood waters, a claim will not be allowed for you to submit your claim for indemnity, following the date we determine the production was sold, fed, utilized in any other manner, or destroyed
 - a. If the level of Aflatoxin or Vomitoxin is in excess of the maximum amount allowed, the claim will be reduced by the percentage of the claim that is disallowed.
 - i. If the level of Aflatoxin or Vomitoxin is in excess of the maximum amount allowed, the claim will be reduced by the percentage of the claim that is disallowed.
 - ii. If the level of Aflatoxin or Vomitoxin is in excess of the maximum amount allowed, the claim will be reduced by the percentage of the claim that is disallowed.
 - b. For production containing Aflatoxin or any other substances or conditions (except for production containing Vomitoxin as detailed in C3 a above), the DF will be:
 - i. If the level of Aflatoxin or Vomitoxin is in excess of the maximum amount allowed, the claim will be reduced by the percentage of the claim that is disallowed.
 - ii. If the level of Aflatoxin or Vomitoxin is in excess of the maximum amount allowed, the claim will be reduced by the percentage of the claim that is disallowed.
 - c. If the level of Aflatoxin or Vomitoxin is in excess of the maximum amount allowed, the claim will be reduced by the percentage of the claim that is disallowed.
 - d. If production qualifying under Section C3 remains unsold, or is not destroyed, more than 365 days after the calendar date for the end of insurance period, the claim will be reduced by the percentage of the claim that is disallowed.

SECTION D - ZERO MARKET VALUE PRODUCTION

If the level of Aflatoxin or Vomitoxin is in excess of the maximum amount allowed, the claim will be reduced by the percentage of the claim that is disallowed.

1. If the level of Aflatoxin or Vomitoxin is in excess of the maximum amount allowed, the claim will be reduced by the percentage of the claim that is disallowed.
