General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Special Provisions

2026 and Succeeding Crop Years

Year: 2026

Commodity: Barley (0091)

Use WU @ HUD

Date: 6/17/2025

Plan: Yield Protection (01)

County: Crawford (033)

Revenue Protection (02)

Revenue Prot with Harvest Price Exclusion (03)

- *3 You may elect to exclude coverage for the specialty type(s) under revenue protection provided you purchase, from the same approved insurance provider, yield protection for the excluded type(s). The yield protection plan of insurance you purchase may have a different coverage level or percentage of projected price than you have for the revenue protection plan of insurance. You may exclude any or all of the specialty type(s) you produce; however, you must continue to insure all type(s) not excluded under revenue protection.

Type

- *4 Approved malting barley varieties will include all varieties recommended for malting by the American Malting Barley Association for the current crop year, or any variety grown under the terms of a malting barley contract. See the definition of "contract" in the applicable Malting Barley Endorsement.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Price

- *6 The Base (contracted) Price will not include added value attributable to hauling expenses beyond the local marketing area or post production operations such as processing (cleaning/drying), sorting, packaging, etc.
- *7 If you produce the following specialty barley type (including specialty type(s) grown for seed):

Malting - varieties recommended for malting by the American Malting Barley Association for the current crop year, or any variety grown under the terms of a malting barley contract. Winter and Spring will be separate specialty types if separate type codes exist in the county.

You may elect to use the price contained in your production contract (contract price) as your projected price for the specialty type. This acreage must be under contract with a business enterprise equipped with facilities appropriate to handle and store specialty type barley production. The contract must be executed by you and the business enterprise, in effect for the crop year, and you must provide a copy to us no later than the acreage reporting date. To be considered a contract, the executed document must contain:

(a) A requirement that you plant, grow and deliver specialty type barley to the business enterprise;

(b) The amount of production that will be accepted or a statement that all production from a specified number of acres will be accepted. To determine the number of acres under contract:

(1) For acreage only based contracts and, acreage and production contracts which specify a maximum number of acres, the lesser of:

(i) The insured acres (planted acreage and acreage that is prevented from being planted); or

(ii) The maximum number of acres specified in the contract.

Special Provisions 2026 and Succeeding Crop Years

Year: 2026	Commodity: Barley (0091)	Use MMU @ HUD
Date: 6/17/2025	Plan: Yield Protection (01) Revenue Protection (02) Revenue Prot with Harvest Price Exclusion (03)	County: Crawford (033)

(2) For production only based contracts, the lesser of:

- (i) The number of acres determined by dividing the production stated in the contract by the approved yield; or
- (ii) The insured acres (planted acreage and acreage that is prevented from being planted).

(3) Acreage in excess of (1) or (2) shall be considered acreage not under contract.

(c) The price to be paid for the contracted production or a method to determine such price:

(1) If the contract provides for a premium amount over a

(i) Feed barley price to be determined after the acreage reporting date, the contract price will be the result of adding the premium amount to the published projected price on the acreage reporting date; or

(ii) Price other than a feed barley price that is determined after the acreage reporting date, the contract price will be the result of adding the basis or premium amount to the Malt Barley Endorsement published projected price on the acreage reporting date.

(2) The price used will be the price in the contract without regard to incentives or discounts.

(3) In no case will the contract price exceed the amount determined by multiplying the projected price by the maximum contract price factor shown in the Prices tab in these Actuarial Documents.

(4) If you have more than one contract price for any one specialty type, the price used will be the weighted average of the contract prices. Each contract price is subject to the limits referred to in (c)(3).

(d) Other such terms that establish the obligations of each party to the contract; and

(e) The contract must clearly indicate the specific specialty type or verification must be provided that the contracted variety is one of the specialty types listed above.

Any acreage of the specialty type that is not under a contract per (b)(3) above, or for which a contract is not submitted to us by the acreage reporting date, will be valued at the applicable barley projected price. A weighted average price will be determined from all the contracted and non-contracted acreage of the specialty type, to produce one projected price that will be used in determining the guarantee (per acre), premium, prevented planting payment, replanting payment, and indemnity for the applicable specialty type acreage.

Section 9 ~~Replanting Payments~~ of the Small Grains Crop Provisions apply to all insurable barley types.

Note: Quality adjustment will be provided as specified in the crop provisions and special provisions. No additional quality adjustment will be made for any specialty type, except for malting barley insured under the Malting Barley Endorsement.

Special Provisions 2026 and Succeeding Crop Years

Commodity: Barley (0091)

Plan: Yield Protection (01)

Revenue Protection (02)

Insurance Availability

In addition to Section 35 of the Basic Provisions, if you elect to obtain a Farm Service Agency Graze-Out Payment for acres of this crop grazed by livestock and not otherwise harvested, you are not eligible for an indemnity.

- *10 There are three ways to insure malting barley: (1) Under yield protection or revenue protection, based on a price calculated in accordance with the Commodity Exchange Price Provisions, as applicable; (2) Under yield protection or revenue protection with added protection provided in accordance with the Malting Barley Endorsement (MBE); or (3) under yield protection, based on a price contained in a production contract as indicated below.

If you produce the following specialty barley type (including specialty type(s) grown for seed):

Malting - varieties recommended for malting by the American Malting Barley Association for the current crop year, or any variety grown under the terms of a malting

You may elect to exclude coverage for the specialty type under revenue protection (excluding malting barley insured under the MBE) provided you purchase, from the same approved insurance provider, yield protection for the excluded type(s). The yield protection plan of insurance you purchase may have a different coverage level or percentage of projected price than you have for the revenue protection plan of insurance. You may exclude any or all of the specialty type(s) you produce; however, you must continue to insure all type(s) not excluded under revenue protection.

Quality

GENERAL STATEMENTS:

V@Á||, ā*Á^&ā}•Á}[^Á][^ÁÁæ^Á|æÁ|[ā&ā}Á|Á@Á•^|ā&[|È

adjustment factors are considered in determining production to count.

The production to count remaining after allowable reductions to gross production (in accordance with the applicable Crop Provisions), is multiplied by the QAF (not less than zero) to determine net production to count.
