General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

1. OPTION TO DELAY CLAIM SETTLEMENT:

- a. On the date of final inspection for the unit, if any of your unsold***** production qualifies for quality adjustment under sections B and/or C1 or C2a ii and C2a iv below, your claim will be settled using the applicable DFs for unsold production unless you elect in writing to delay settlement of your claim for up to 60 days after the calendar date for the EOIP.
- b. If you sell the production to a disinterested third party during this delay, your claim will be settled using the Reduction In Value (RIV) as outlined below, unless
- c. For any production sold***** to other than a disinterested third party**, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.
- d. For any production sold***** to other than a disinterested third party**, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.
- e. If the production is later sold, we will not recalculate or adjust your claim for indemnity.
- f. For any production sold***** to other than a disinterested third party**, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.
- g. For any production sold***** to other than a disinterested third party**, or that is not sold 60 days after the calendar date for the EOIP, we will settle your claim using the applicable DFs.

1. QUALITY ADJUSTMENT STATEMENT (QAS)

QAS is a statement of quality deficiencies that must be obtained in accordance with this Quality Adjustment Statement, but not later than 60 days after the EOIP, otherwise such production will not be eligible for payment. The QAS must be obtained from a qualified person, such as a grain elevator operator, a grain merchant, or a grain inspector, and must be in writing. The QAS must include the following information: (1) the name of the producer, (2) the name of the qualified person, (3) the date of the inspection, (4) the location of the inspection, (5) the quantity of the production, (6) the quality deficiencies, and (7) the percentage of the production that is affected by the deficiencies. The QAS must be submitted to the FSA within the specified time frame.

5. FAIR CONSIDERATION TO DELIVER TO DISTANT MARKETS

When a producer's production is sold to a distant market, the producer must provide fair consideration to the distant market. This means that the producer must provide the distant market with the same quality and quantity of production as the producer provides to the local market. If the producer cannot provide the same quality and quantity, the producer must provide a written explanation to the distant market.

6. ZERO MARKET VALUE

If on the date of final inspection for the unit, any production which due to insurable causes is determined to have zero market value***, such production will not be eligible for payment. This includes production that is damaged, lost, or destroyed, or production that is sold to a distant market for less than its fair market value.

7. REDUCTION IN VALUE (RIV):

The RIV is the difference between the fair market value of the production and the actual market value of the production.
