General

Contact your agent regarding possible premium discounts, options, and/or additional coverage that may be available.

Corn planted on acreage following a crop that has been prevented from being planted will not be considered a cover crop and will be considered a crop planted for harvest.

Date

In lieu of the definition of late planting period in section 1 of the Basic Provisions, please refer to the End Of Late Planting Period Date.

Insurance Availability

Insurance shall attach to a crop following a cover crop when the cover crop meets the definition provided in the Basic Provisions, was planted within the last 12 months, and is managed and terminated according to NRCS Cover Crop Termination Guidelines. The Guidelines include information on cover crops and crop insurance, Good Farming Practices for cover crops, and termination information and exceptions, which can be found at <https://www.rma.usda.gov/en/Topics/Cover-Crops>.

- *5 Acreage planted to the approved high yielding rye varieties listed below may be insurable under the winter type for the 2025 crop year or producers may request a higher yield by an unrated practice/type (TP) type written agreement under a new high yielding type. For the 2026 crop year moving forward, all approved high yielding varieties will transition to the high yielding type and be insurable only by written agreement. The high yielding characteristic of these varieties will be considered; higher yield offers may be approved as part of the written agreement. Written agreement requests must contain documentation (e.g. seed purchase receipt) of the high yielding variety(ies) the producer is planting.

Approved High Yielding Winter Varieties:

Bono, Serafino, Tayo, Receptor, Brasetto, SU Performer, SU Cossani; additional hybrid varieties will be considered with at least two years of trial yield data results and an approved agricultural expert recommendations as required by the Regional Office.
